

**Q1. Write a program in which to declare all data type like integer ,double,float,long int and print value in specified format**

**Answer-:**

**Algorithm-:**

1. Program start.
2. Declaration of variable a , b, c and d
3. Input the value in variable
4. Display the value of a , b , c and d
5. Program end

**Flowchart-:**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{int a;

    double b;

    float c;

    long int d;

    printf("enter the value of a,b,c and d ");

    scanf("%d %lf %f %d",&a,&b,&c,&d);

    printf("value of a=%d b=%lf c=%f d=%d",a,b,c,d);

    getch();

}
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
enter the value of a,b,c and d 5
50
8
10
value of a=5 b=50.000000 c=8.000000 d=10
```

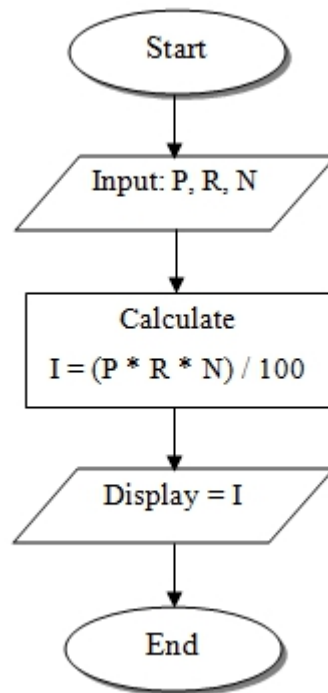

## Q 2. Write a program to calculate the simple interest.

**Answer-:**

**Algorithm -:**

- 1) Program start.
- 2) Declaration of variable with their data type, like :-  
float p,r,t;  
float SI;
- 3) Input the value in variable
- 4) Arithmetic operator used to perform  $SI = (p * r * t) / 100$ ;
- 5) `Printf()` called to print value of variable
- 6) Program end.

**Flowchart-:**

Coding for the program-:

Author-: Jeetu Sahu

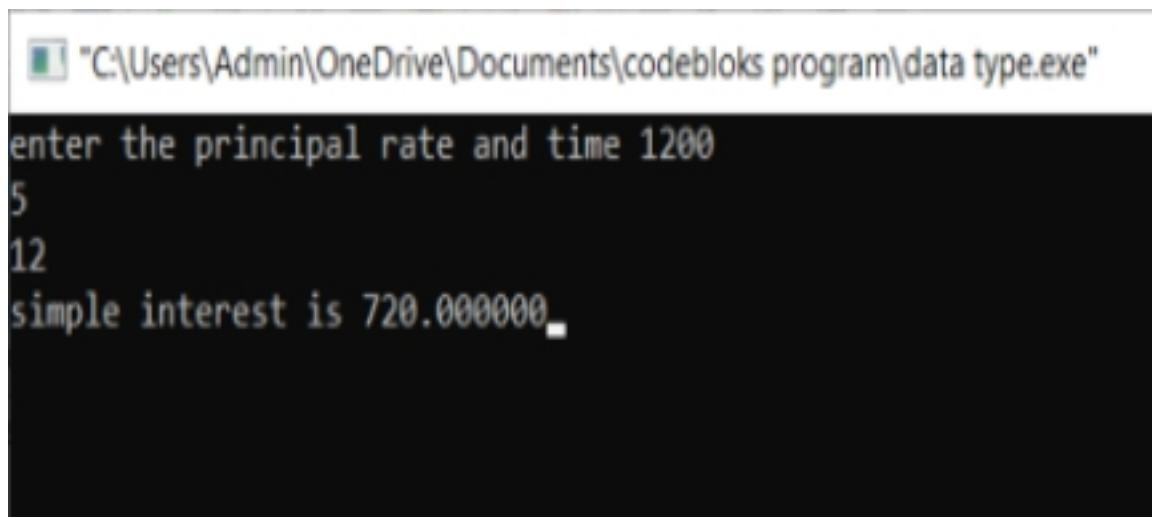

---

```
#include<stdio.h>

#include<conio.h>

void main()
{
    int p,r,t;
    float si;
    printf("enter the principal , rate and time");
    scanf("%d %d %d",&p,&r,&t);
    si=p*r*t/100;
    printf("simple interest is %f",si);
    getch();
}
```

**OUTPUT-:**

A screenshot of a Windows command prompt window. The title bar shows the file path "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe". The command prompt displays the program's output: "enter the principal rate and time 1200", followed by the user input "5" on the next line and "12" on the next line. The final output line is "simple interest is 720.000000\_".

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
enter the principal rate and time 1200
5
12
simple interest is 720.000000_
```

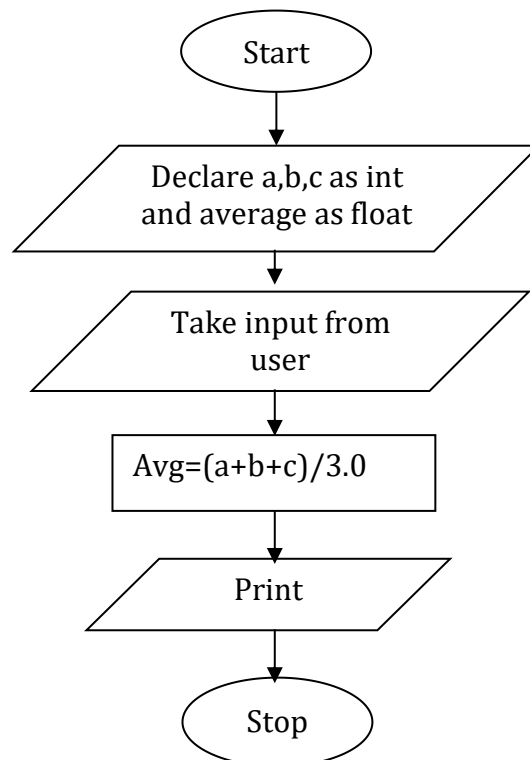

### Q 3. Write a program to find the average of three number.

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable
- 3) Enter the number of value
- 4) Assign the value in variable
- 5) Run arithmetic operator
- 6) Print output(Answer)
- 7) Stop.

**Flowchart:-**

:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{

    int a,b,c;

    float avg;

    printf("enter three number");

    scanf("%d%d%d",&a,&b,&c);

    avg=a+b+c/3.0;

    printf("average is %f",avg);

    getch();

}
```

**OUTPUT-:**

A screenshot of a Windows command prompt window. The title bar at the top reads "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe". The command prompt shows the program's output: "enter three number" followed by the user input "12", then "10", then "5", and finally "average is 23.666666" with a cursor at the end.

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
enter three number 12
10
5
average is 23.666666_
```

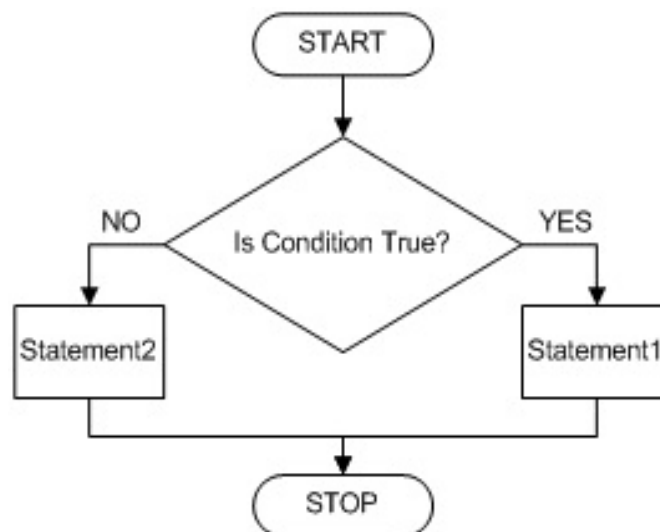

#### Q 4. Write a program to compare two no by using of ternary operator in c

##### Answer-:

##### Algorithm-:

- 1) Start
- 2) Declaration of variable
- 3) Enter the number of value
- 4) Check the condition, ternary (conditional) operator.  
Display answer according the condition
- 5) Stop.

##### Flowchart-:

:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{

    int a,b;

    printf("enter two number");

    scanf("%d%d",&a,&b);

    printf("greater no is %d",a>b?a:b);

    getch();

}
```

**OUTPUT-:**

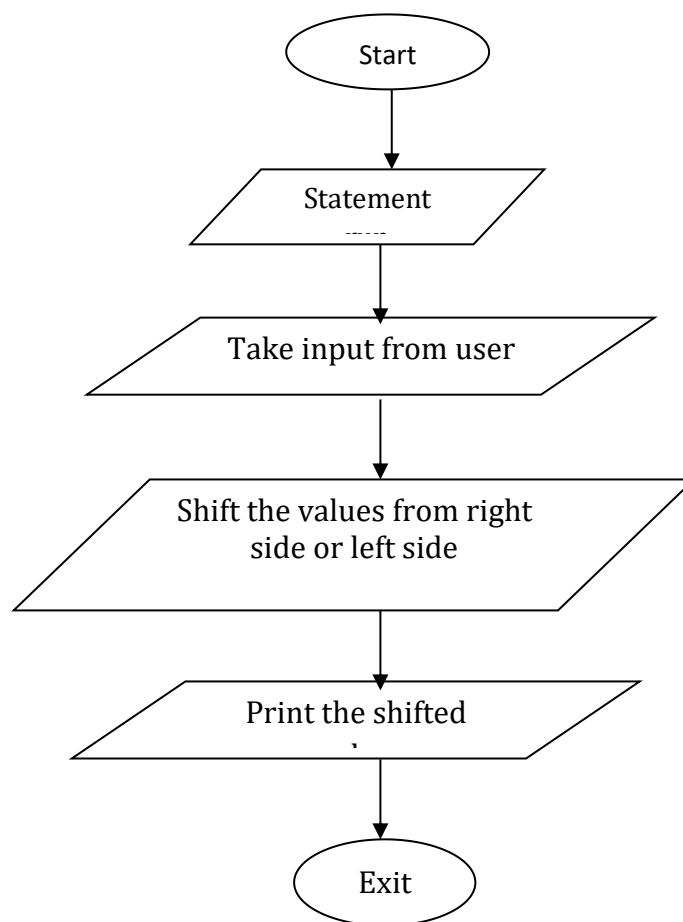

**Q 5. Write a program to use of bitwise operator (left shift and right shift).**

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable
- 3) Enter the number of value
- 4) It print value and value of left &right shift
- 5) Stop

**Flowchart-:**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{

    int x;

    x=56;

    printf("befor any shifting the value is %d\n",x);

    x=56<<2;

    printf("after left shifting the value is %d\n",x);

    x=56>>2;

    printf("after right shifting the value is %d",x);

    getch();

}
```

**OUTPUT-:**

The screenshot shows a Windows command prompt window with the title bar "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe". The window has a black background with white text. The output of the program is displayed as follows:

```
befor any shifting the value is 56
after left shifting the value is 224
after right shifting the value is 14_
```

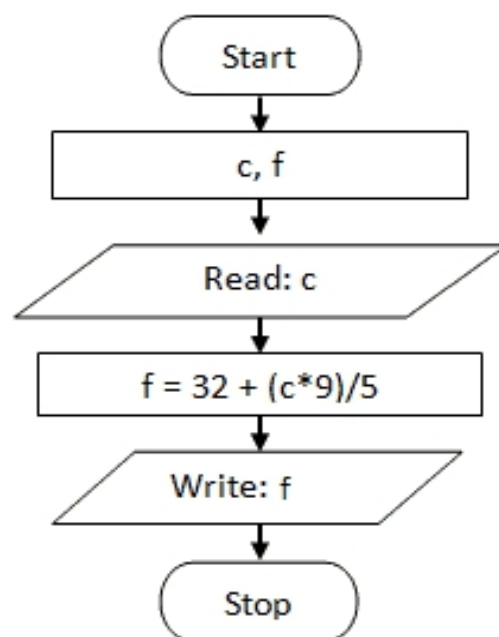

**Q 6. Write a program in c to convert the temperature centigrade into fahrenheit.**

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable
- 3) Enter temperature in Celsius
- 4) Fahrenheit conversion formula
- 5) Print result
- 6) Stop

**Flowchart-:**

Coding for the program-:

Author-: Jeetu Sahu

---

```
#include<stdio.h>

#include<conio.h>

void main()

{

    float c, f;

    printf("enter the centigrade");

    scanf("%f",&c);

    f=c*9/5+32;

    printf("temprecture in fahreheit is %f",f);

    getch();

}
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
enter the centigrade 37
temprecture in fahreheit is 98.599998_
```

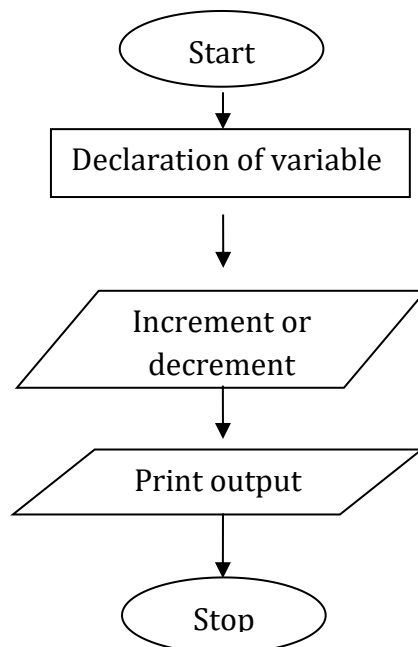

## Q 7. Write a program in c for increment and decrement operator.

**Answer:-**

**Algorithm:-**

- 1) Start
- 2) Declaration of variable
- 3) Increment or decrement in value from oprater
- 4) Output
- 5) Stop

**Flowchart:-**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int x=5;

    x++;      // post increment operater

    printf("x= %d\n",x);

    ++x;      //pre increment operater

    printf("x= %d\n",x);

    x--;      //post decrement operater

    printf("x= %d\n",x);

    --x;      //pre decrement operater

    printf("x= %d\n",x);

    getch();

}
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

x= 6
x= 7
x= 6
x= 5
```

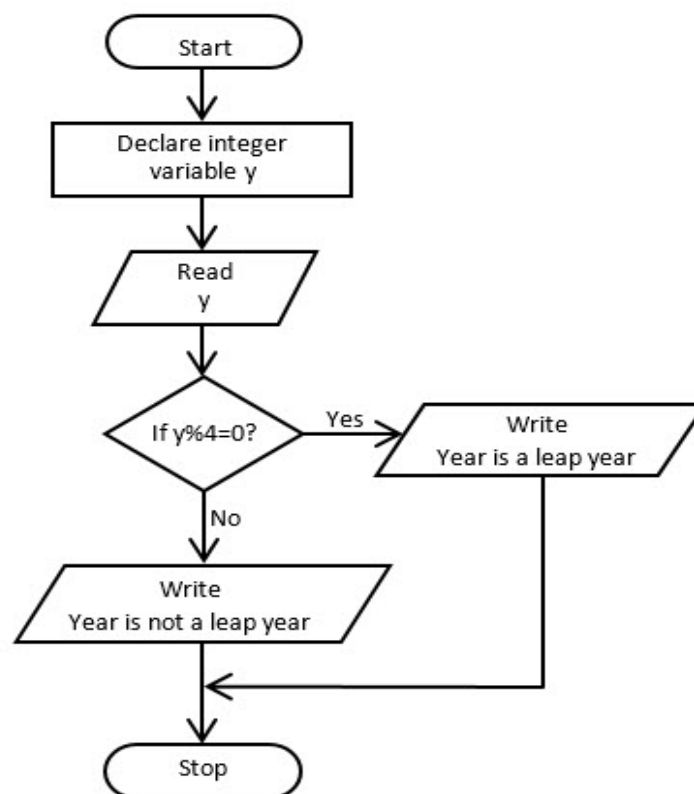

**Q 8. Write a program to check whether enter year is leap or not(if ...else)**

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable
- 3) Enter year to check leap year or not
- 4) Check condition
- 5) Give answer according to condition
- 6) Stop

**Flowchart:-**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int year;

printf("enter the year");

scanf("%d",&year);

if(year%100==0)

{ if(year%400==0)

printf("leap year");

else

printf("not a leap year");

}

else

{ if(year%4==0)

printf("leap year");

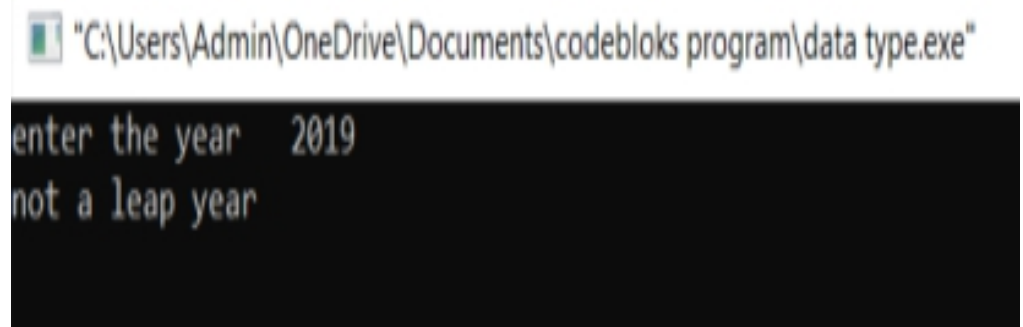

else

printf("not a leap year");

}

getch(); }
```

**OUTPUT-:**

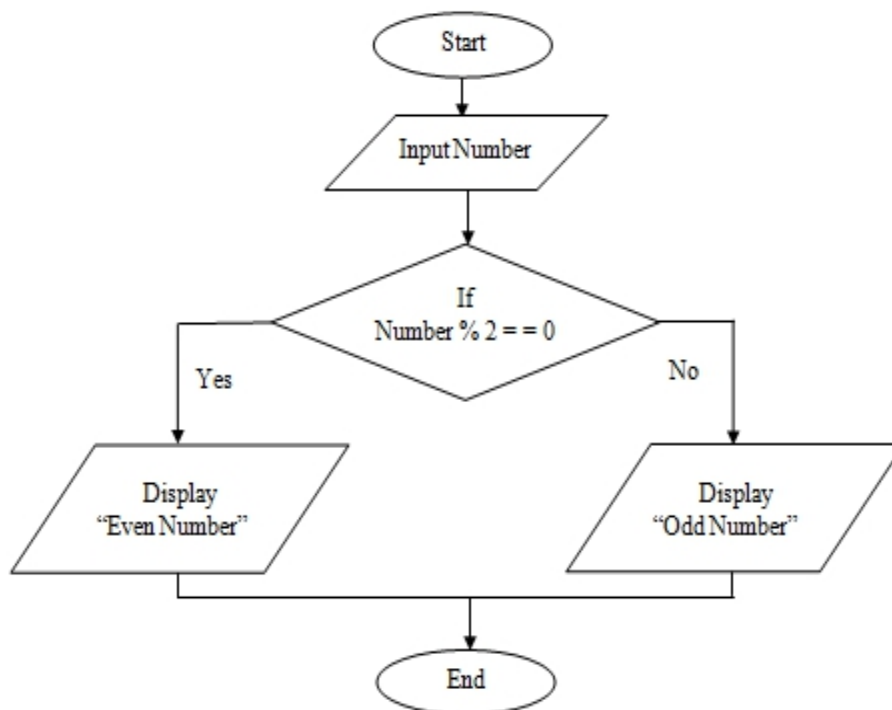

**Q 9. Write a program to find even and odd no by using if else statement.**

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable
- 3) Enter the number
- 4) Assign the value in variable
- 5) Check condition
- 6) Give answer according to condition
- 7) Stop

**Flowchart: -**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{

    int x;

    printf("enter a number");

    scanf("%d",&x);

    if(x%2==0)

        printf("even nuber");

    else

        printf("odd number");

    getch();

}
```

**OUTPUT-:**

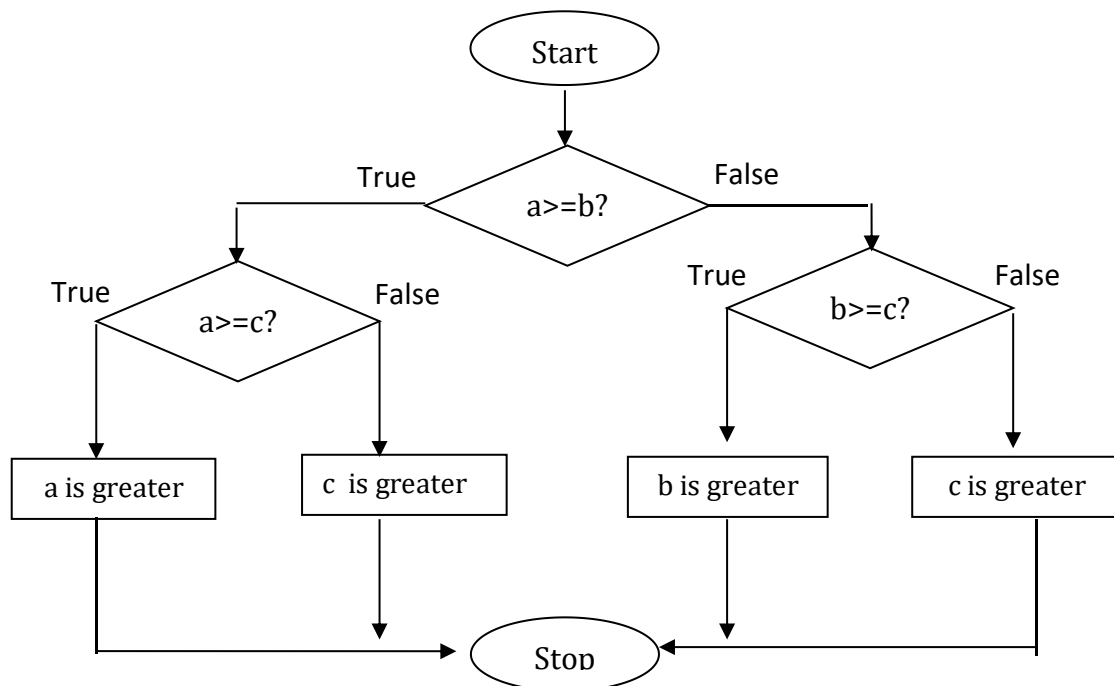

**Q 10. Write a program to find largest among three no using nested if statement**

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable
- 3) Enter the number
- 4) Assign the value in variable
- 5) Check condition
- 6) Give answer according to condition
- 7) Stop

**Flowchart:-**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

```
#include<stdio.h>

#include<conio.h>

void main()

{ int a,b,c,z;

printf("enter three number");

scanf("%d %d %d",&a,&b,&c);

if(a>b) {

    if(a>c)

        z=a;

    else

        z=c;

}

Else { if(b>c)

    z=b;

else

    z=c;

}

printf("greater number is %d",z) ;

getch(); }
```

**OUTPUT:-**

**Q 11. Write a program to take input of 5 subject . find total and calculate percent. On the basis of percent provide grade like:**

**IF Per > 80 “A+”**

**Per >= 65 and per <=80 “A”**

**Per > =50 and per <=65 “B”**

**Per >= 42 and per <=50 “C”**

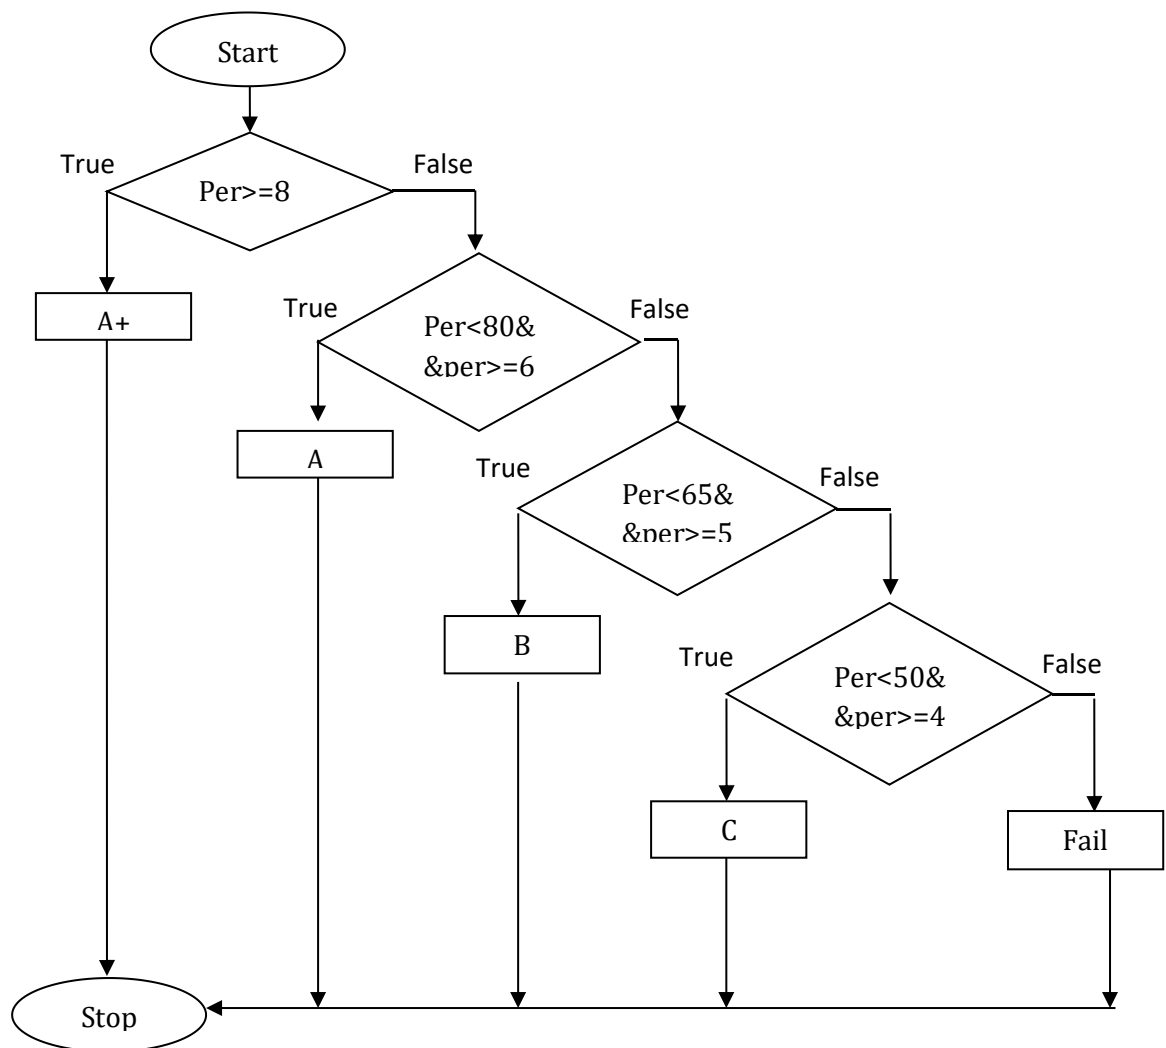

**Per < 42 “Fail”**

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable
- 3) Enter the subject marks
- 4) Assign the value in variable
- 5) Check condition
- 6) Give answer according to condition
- 7) Stop

### Flowchart: -

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program:-**

**Author:- Jeetu Sahu**

```
#include<stdio.h>

#include<conio.h>

void main()

{ int a,b,c,d,e,total;

float per;

printf("enter your marks");

scanf("%d %d %d %d %d",&a,&b,&c,&d,&e);
```

```

total=a+b+c+d+e;

printf("\ntotal marks is %d\n",total);

per=total*100/(5.0*100);

printf("percent is %f\n",per);

if(per>80)

printf("A+");

else{ if(per>=65&&per<=80)

printf("A");

else { if(per>=50&&per <=65 )

printf("B");

else { if(per >= 42 && per <=50 )

printf("C");

else

printf("Fail");

}

}

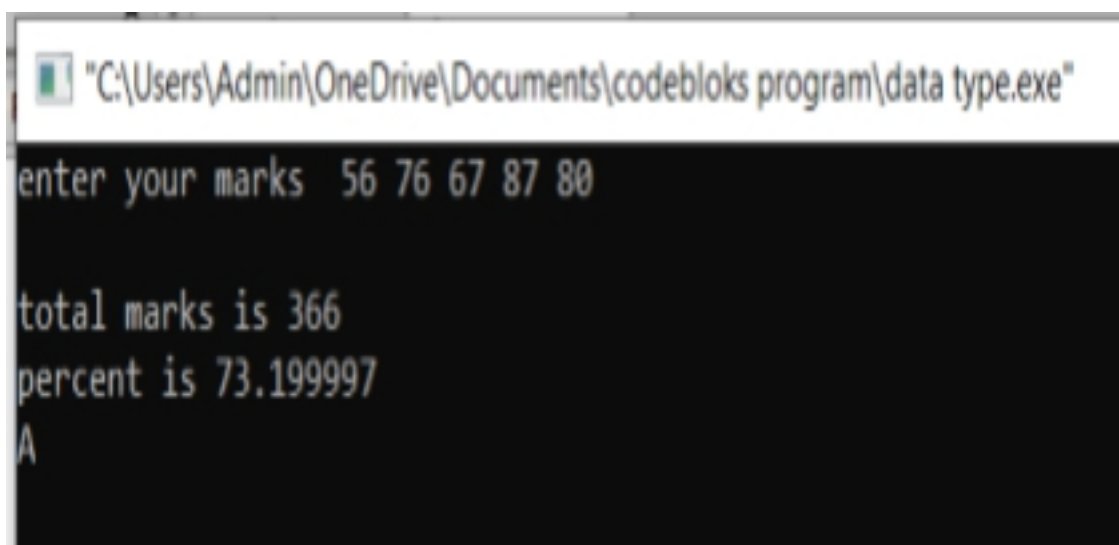

}

getch();

}

```

### OUTPUT-:

```

"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
enter your marks 56 76 67 87 80

total marks is 366
percent is 73.199997
A

```

**Q 12. Write a program in C to read any Month Number in integer and display Month name in. the word.(using switch case)**

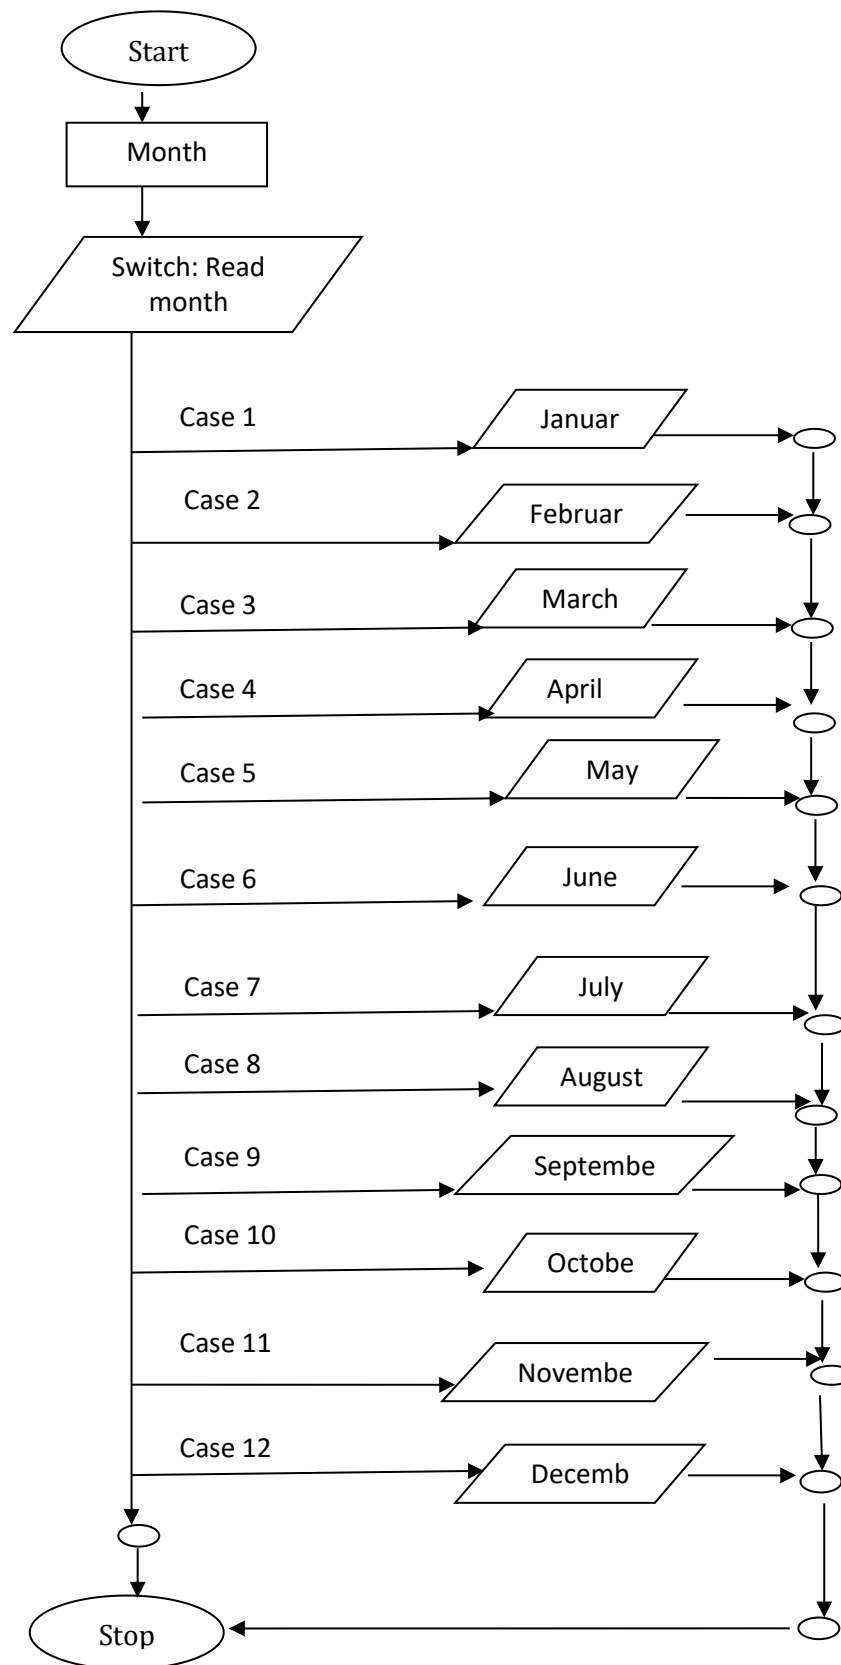

**Answer-:**

**Algorithm: -**

- 1) Start
- 2) Declaration of variable
- 3) Enter month number
- 4) Assign the value in variable
- 5) Pass number in switch() case
- 6) Give answer according to value
- 7) Stop

**Flowchart: -**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()
{
    int chose;

    printf("\n enter the month number");

    scanf("%d",&chose);

    switch(chose)
    {
        case 1: printf("Month is : January");

            break;

        case 2: printf("Month is : February");

            break;

        case 3: printf("Month is : March");

            break;

        case 4: printf("Month is : April");

            break;

        case 5: printf("Month is : May");

            break;

        case 6: printf("Month is : June");

            break;

        case 7: printf("Month is : July");

            break;

        case 8: printf("Month is : August");
```

```
        break;

    case 9: printf("Month is : September");

        break;

    case 10: printf("Month is : October");

        break;

    case 11: printf("Month is : November");

        break;

    case 12: printf("Month is : December");

        break;

    default : printf("invalid number");

}

getch();

}
```

### OUTPUT-:

 "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

```
enter the month number 1
Month is : January
```

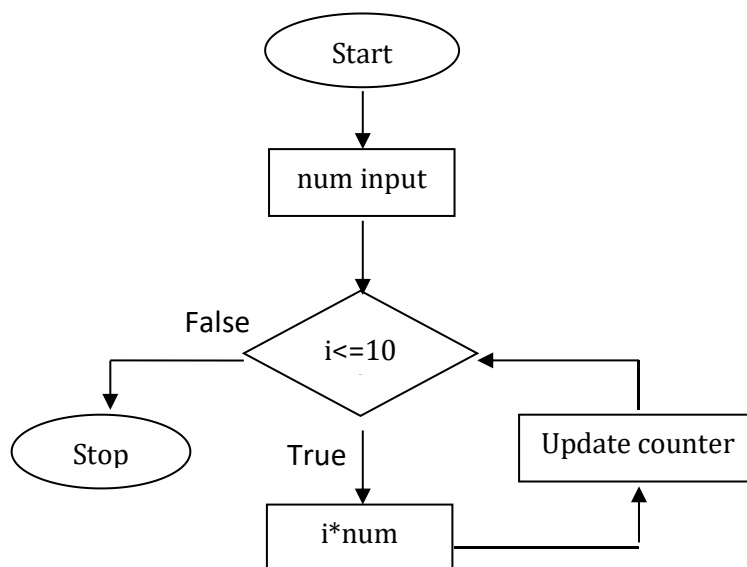

**Q13. Write a program to print multiplication table of given number.**

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable
- 3) Enter the number
- 4) Assign the value in variable
- 5) Check condition
- 6) Give answer according to condition
- 7) Stop

**Flowchart: -**

Coding for the program-:

Author-: Jeetu Sahu

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int num,i;

printf("enter a number");

scanf("%d",&num);

for(i=1;i<=10;i++)

{

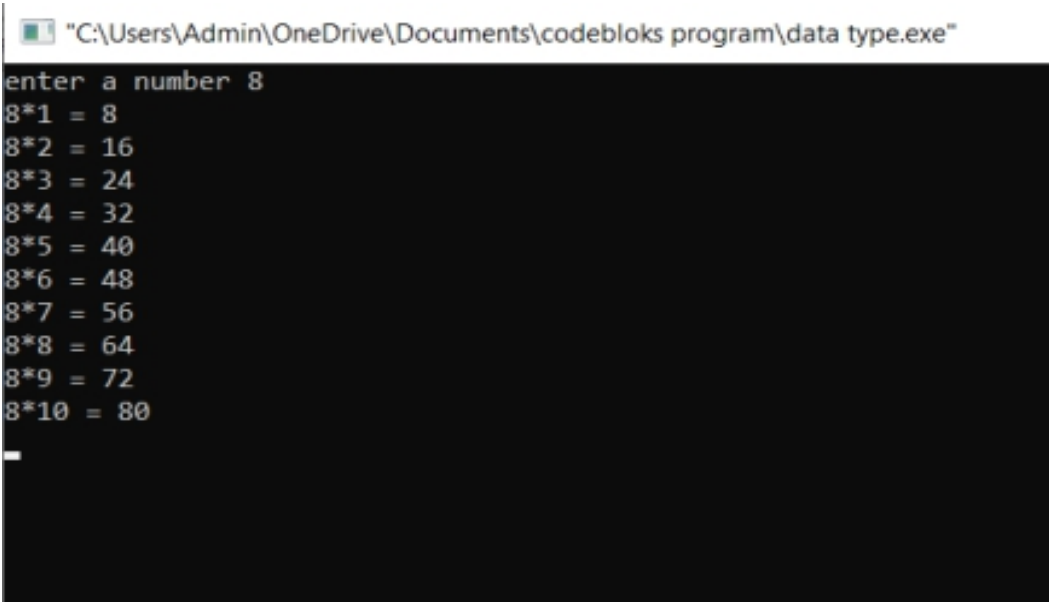

printf("%d*%d = %d\n",num,i,num*i);

}

getch();

}
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
enter a number 8
8*1 = 8
8*2 = 16
8*3 = 24
8*4 = 32
8*5 = 40
8*6 = 48
8*7 = 56
8*8 = 64
8*9 = 72
8*10 = 80
_
```

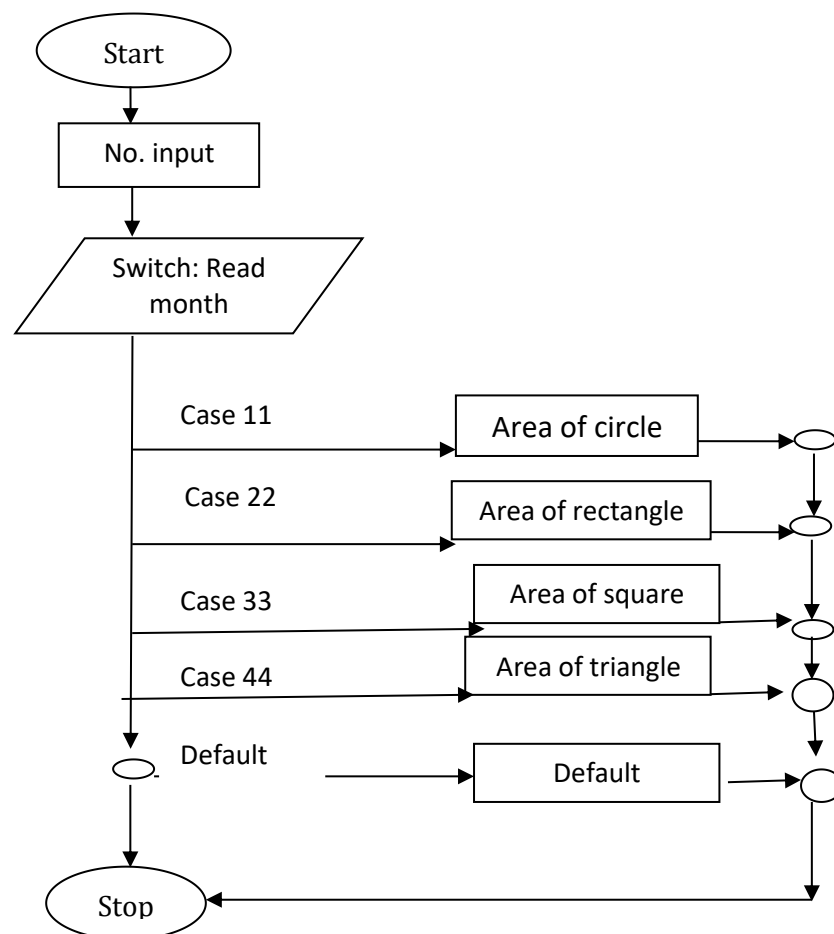

**Q14. Write a program by using switch case if user enter 11 it will have area of circle and when user enter 22 it will have area of rectangle and when user enter 33 it will give area of square when user enter 44 it will give area of triangle.**

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable
- 3) Enter number
- 4) Assign the value in variable
- 5) Pass number in switch() case
- 6) Give answer according to value
- 7) Stop

**Flowchart-:**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()
{
    int chose,r,a,aos,w,h,bh,vh,aor,aot;

    float aoc;

    printf("\n1. get area of circle");
    printf("\n2. get area of rectangle");
    printf("\n3. get area of square");
    printf("\n4. get area of triangle");
    printf("\n \n Enter your chose");

    scanf("%d",&chose);

    switch(chose){

        case 11:    printf("Enter the radius");

                    scanf("%d",&r);

                    aoc=3.14*r*r;

                    printf("area of circle is : %f",aoc);

                    break;

        case 22:    printf("Enter the height and width");

                    scanf("%d%d",&h,&w);

                    aor=h*w;

                    printf("Area of rectangle is : %d",aor);

                    break;

        case 33:    printf("Enter the length of side");
```

```

        scanf("%d",&a);

        aos=a*a;

        printf("Area of square is : %d",aos);

        break;

case 44: printf("Enter the base and vertical height");

        scanf("%d %d",&bh,&vh);

        aot=1/2*bh*vh;

        printf("Area of tringle is : %d",aos);

        break;

default : printf("invalid choise");

    }

    getch();

}

```

## OUTPUT-:

```

C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe

11. get area of circle
22. get area of rectangle
33. get area of square
44. get area of triangle

Enter your choise 44
Enter the base and vertical height 4
7
Area of tringle is : 75

```

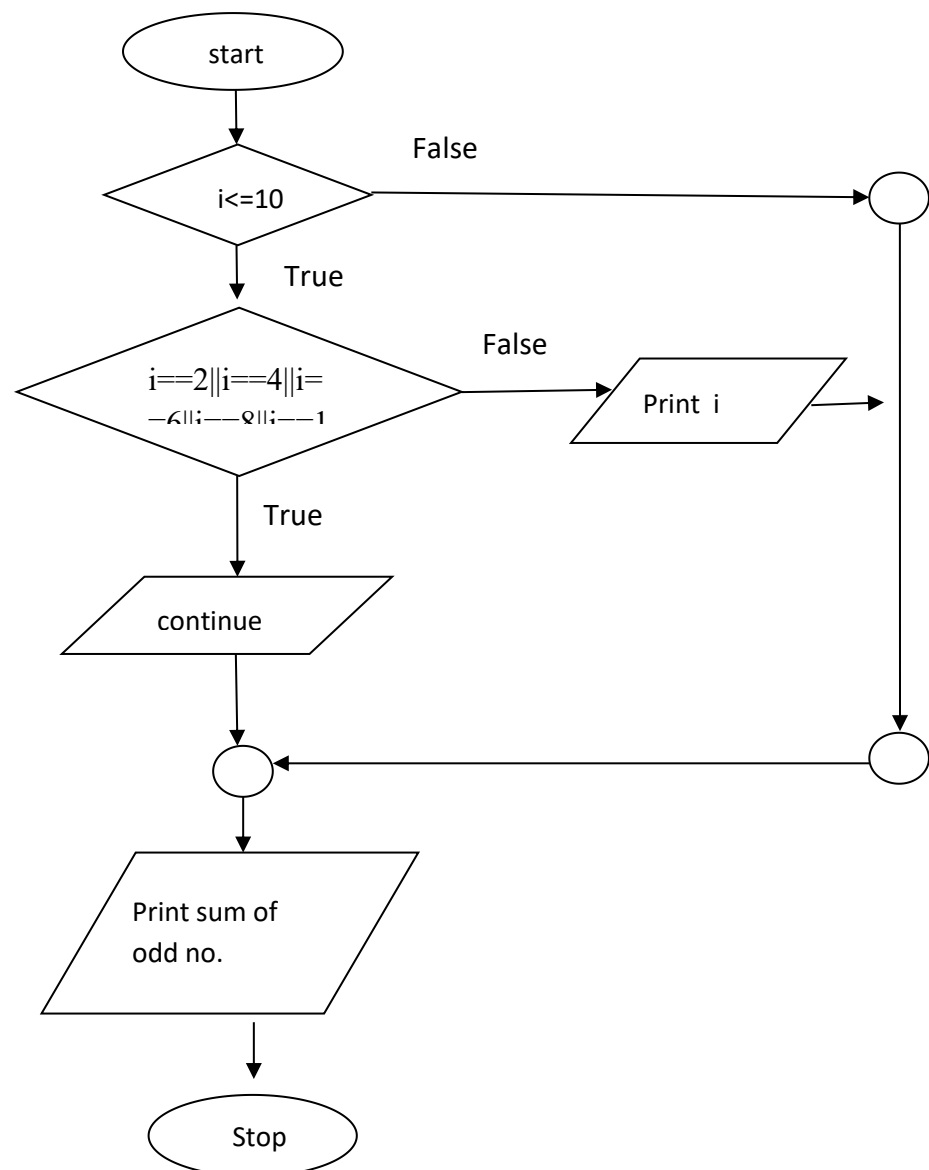

**Q15.write a prigram in c to print sum of odd no between 0 to 10 using continue.**

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable
- 3) Check condition
- 4) Give answer according to condition
- 5) Stop

**Flowchart-:**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{

    int i,sum=0;

    for(i=1;i<=10;i++) {

        if(i==2||i==4||i==6||i==8||i==10)

            continue;

        else

            printf("\n %d",i);

            sum=sum+i;

    }

    printf("\nsum of odd number is %d",sum);

    getch();

}
```

**OUTPUT-:**

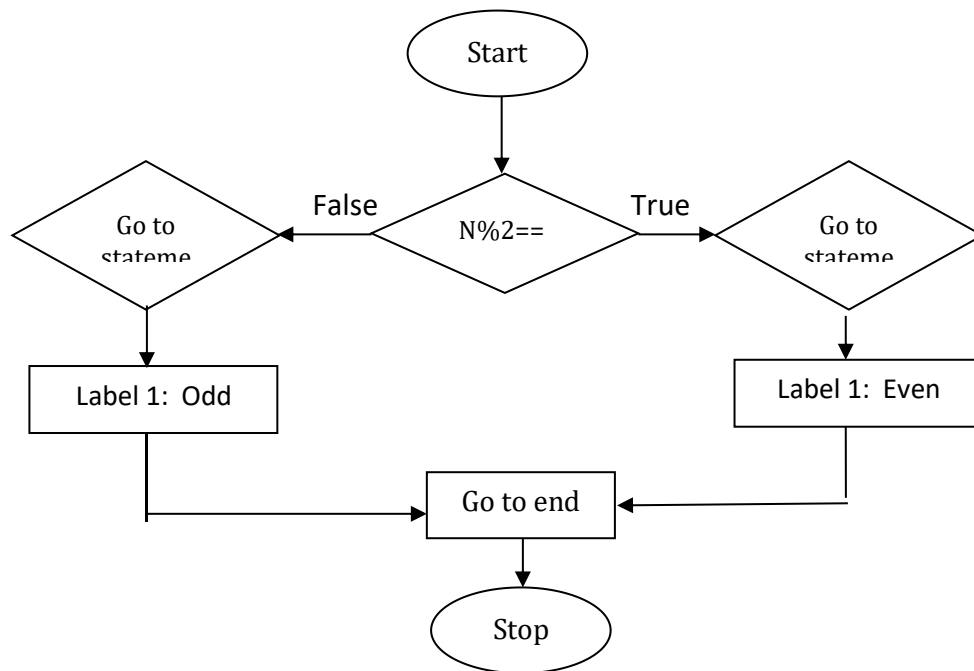

### Q.16 write a program in c using goto statement.

**Answer:-**

**Algorithm:-**

- 1) Start
- 2) Declaration of variable
- 3) Enter number
- 4) Assign the value in variable
- 5) Check condition
- 6) Give answer according to condition
- 7) Stop

**Flowchart:-**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int n;

printf("enter a number");

scanf("%d",&n);

if(n%2==0)

goto even;

else

goto odd;

odd: printf("odd number");

goto end;

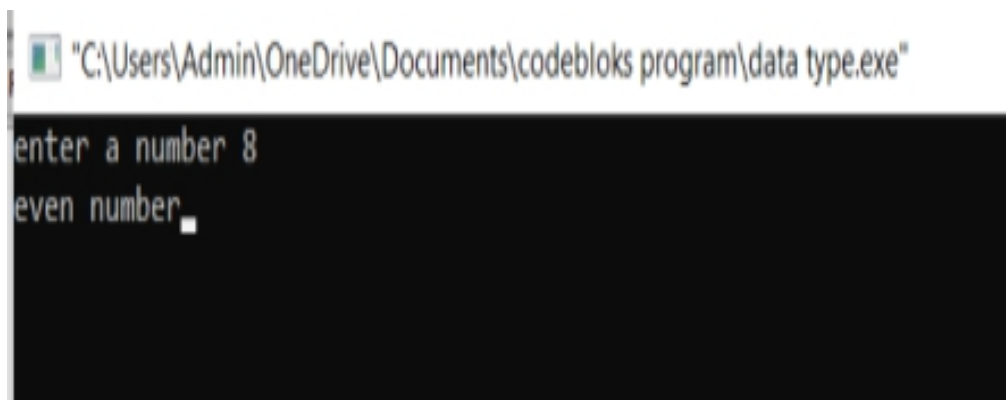

even: printf("even number");

goto end;

end:

getch();
```

**OUTPUT-:**

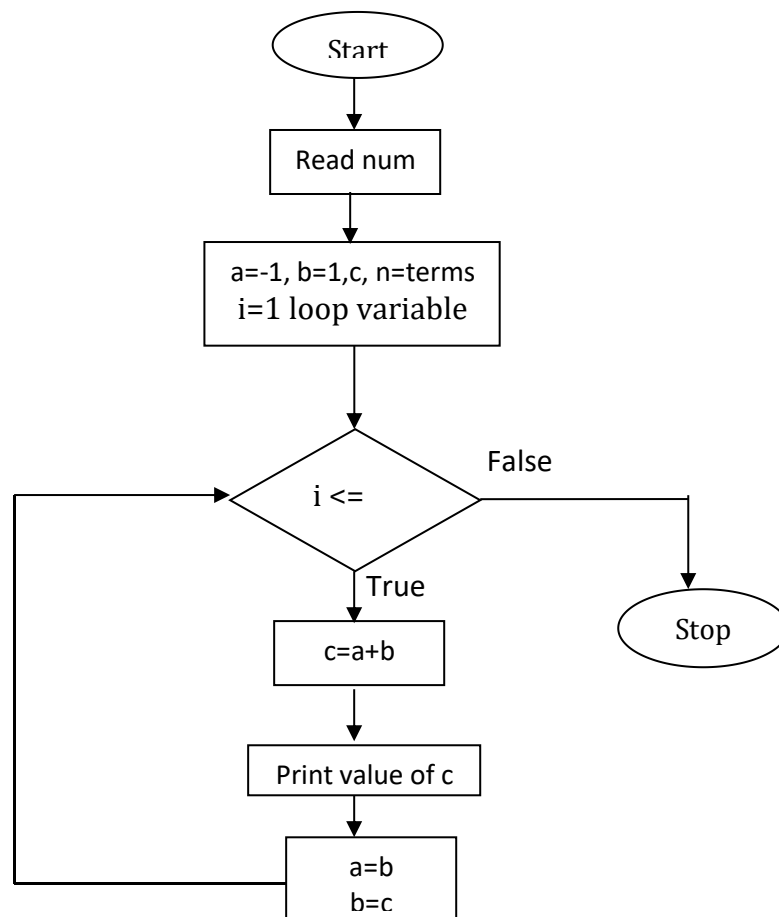

## Q 17. Write a program to find Fibonacci series upto n terms

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable  $a=-1, b=1, c, n$
- 3) Enter of terms (Fibonacci series)
- 4) Assign the value in variable
- 5) Check condition
- 6) Give answer according to condition
- 7) Stop

**Flowchart-:**

Coding for the program-:

Author-: Jeetu Sahu

---

```
#include<stdio.h>

#include<conio.h>

void main()

{   int n,i,a=-1,b=1,c;

    printf("enter a number");

    scanf("%d",&n);

    for(i=1;i<=n;i++)

    {c=a+b;

      a=b;

      b=c;

      printf("%d",c);

    }

    getch();

}
```

**OUTPUT-:**

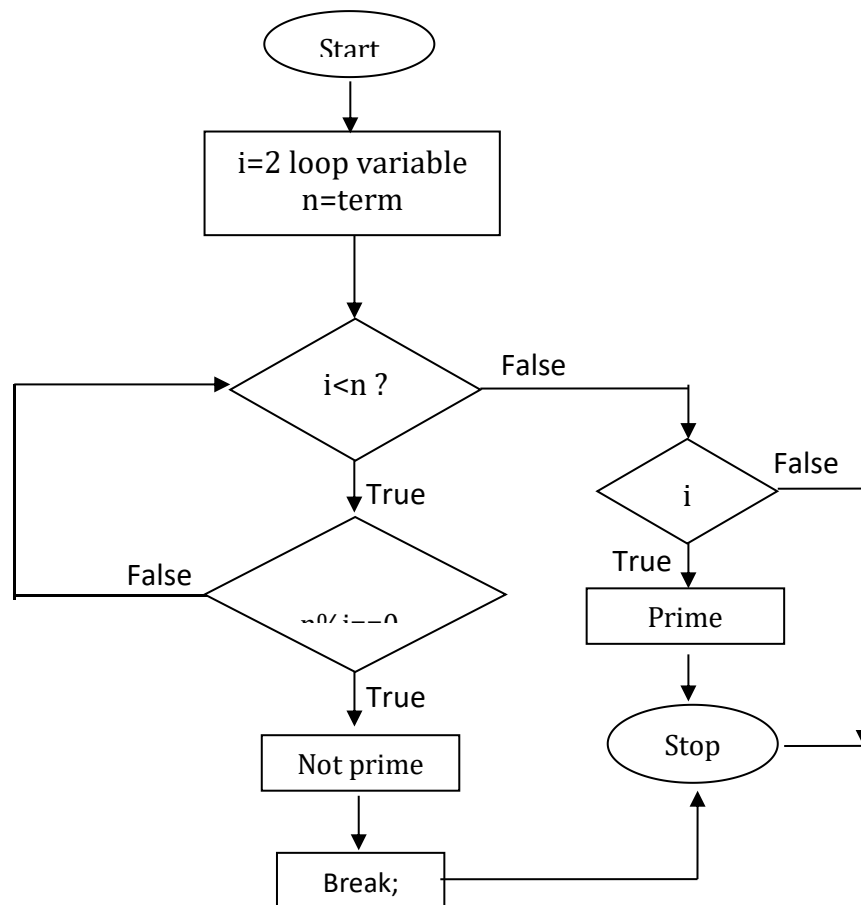

**Q 18. Write a program in c to check whether the no is prime or not**

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable
- 3) Enter the number to check prime or not
- 4) Assign the value in variable
- 5) Check condition
- 6) Give answer according to condition
- 7) Stop

**Flowchart-:**

Coding for the program-:

Author-: Jeetu Sahu

---

```
#include<stdio.h>

#include<conio.h>

void main()

{int n,i;

    printf("enter a number");

    scanf("%d",&n);

    for(i=2;i<=n-1;i++)

    { if(n%i==0)

        {

            printf("not a prime number");

            break;

        }

    }

    if(i==n)

        printf("prime number");

    getch();

}
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
enter a number 13
prime number_
```

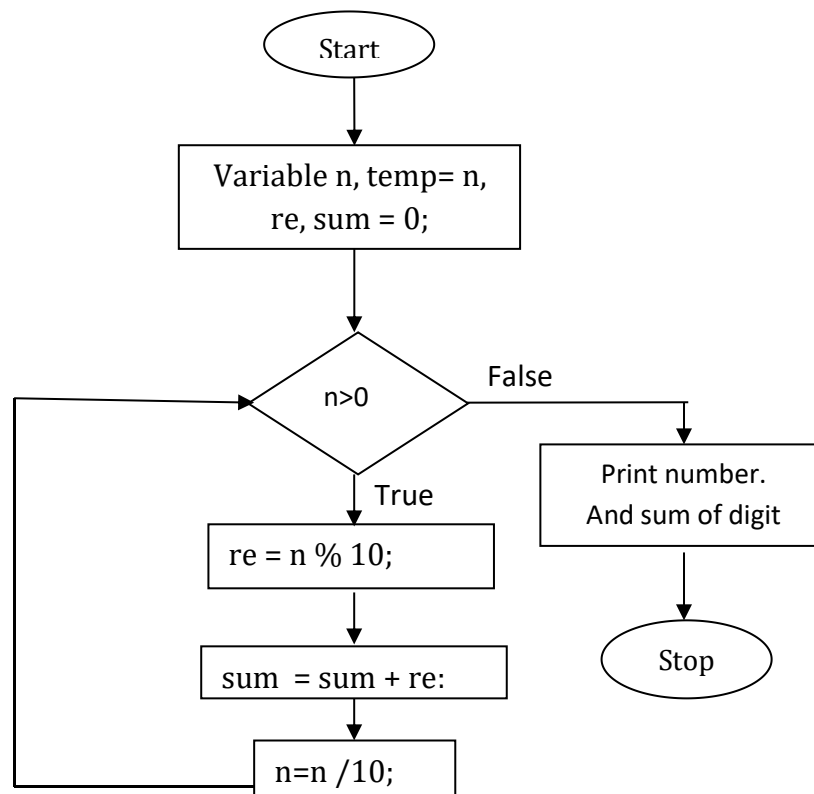

## Q 19. Write a program in c to sum of digit.

**ANSWER:-**

### Algorithm

- 1) Start
- 2) Declaration of variable
- 3) Enter the number
- 4) Input the value in variable
- 5) Check condition
- 6) Give answer according to condition
- 7) Stop

**Flowchart: -**

**Coding for the program-:**

**Author-: Jeetu Sahu**

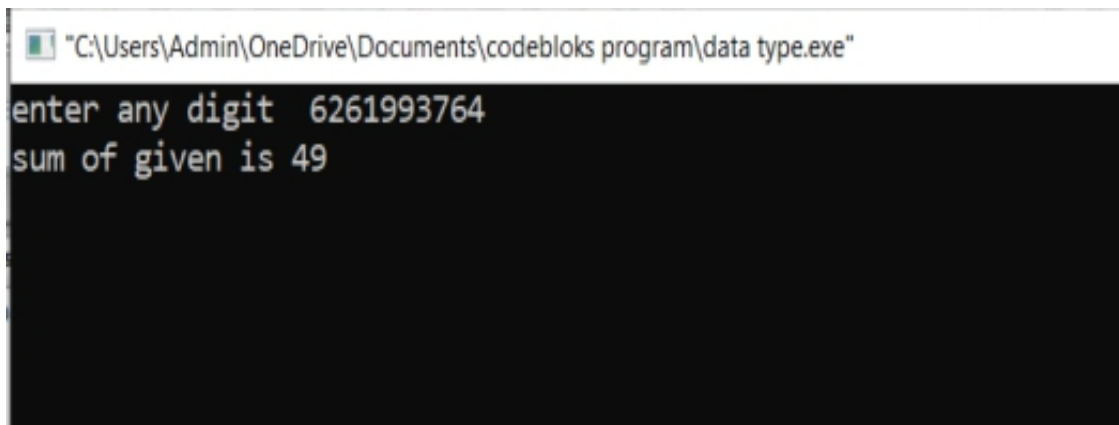

---

```
#include<stdio.h>

#include<conio.h>

void main()
{
    int n,re,sum=0;
    printf("enter any digit");
    scanf("%d",&n);
    while(n>0)
    {
        re=n%10;
        sum=sum+re;
        n=n/10;
    }
    printf("sum of given is %d",sum);
    getch();
}
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
enter any digit 6261993764
sum of given is 49
```

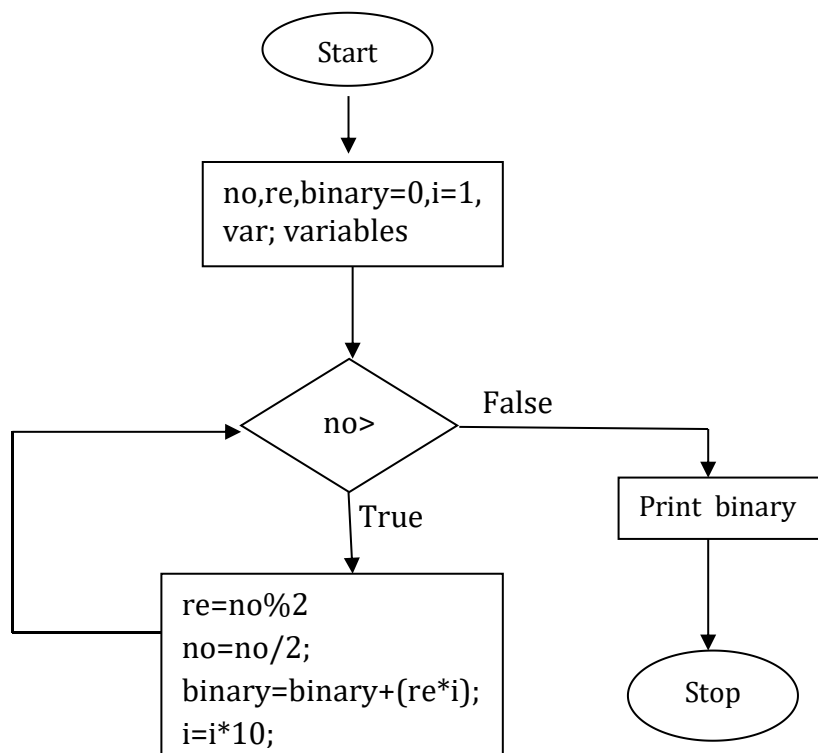

## Q 20. Write a program to convert decimal to binary.

**Answer-:**

**Algorithm-:**

- 1) Start
- 2) Declaration of variable
- 3) Enter the number to convert binary form
- 4) Input the value in variable
- 5) Check condition
- 6) Give answer according to condition using for loop
- 7) Stop

**Flowchart:-**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int no,re,binary=0,i=1,var;

printf("enter a number");

scanf("%d",&no);

var=no;

while(no!=0) {

re=no%2;

no=no/2;

binary=binary+(re*i);

i=i*10;

}

printf("binary equivalent of %d is %d",var,binary);

getch();

}
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\odd2.exe"
enter a number 56
binary equivalent of 56 is 111000
```

## Q 21. Write a program in c to check Armstrong no.

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int n,r,s,x;

printf("armstrong number are :\n");

for(n=1;n<=1000;n++)

{ x=n;

s=0;

while(x!=0) {

r=x%10;

s=s+r*r*r;

x=x/10;

}

if(s==n)

printf("%d\n",n);

}

}
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
armstrong number are :
1
153
370
371
407

Process returned 1 (0x1)   execution time : 0.049 s
Press any key to continue.
```

**Q 22. Write a c program to following pattern:**

\*

\* \*

\* \* \*

\* \* \* \*

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int i,j;

  for(i=1;i<=4;i++)

  {

    for(j=1;j<=4;j++)

    {

      if(j<=i)

        printf("*");

      else

        printf(" ");

    }

    printf("\n");

  }

  getch();

}
```

## OUTPUT-:

A screenshot of a Windows command prompt window. The title bar at the top reads "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe". The command prompt area is black with white text. It displays four lines of asterisks: a single asterisk on the first line, two asterisks on the second line, three asterisks on the third line, and four asterisks on the fourth line.

```
*  
**  
***  
****
```

**Q 23. Write a c program to following pattern:**

1

1 2

1 2 3

1 2 3 4

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int i,j,x;

  for(i=1;i<=4;i++)

  {   x=1;

      for(j=1;j<=4;j++)

      {   if(j<=i)

          { printf("%d",x);

              x++;

          }

          else

              printf(" ");

      }

      printf("\n");

  }

  getch(); }
```

## OUTPUT-:

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"  
1  
12  
123  
1234
```

**Q 24. Write a c program to following pattern:**

**1**

**2 3**

**4 5 6**

**7 8 9 10**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int i,j,x=1;

  for(i=1;i<=4;i++)

  {

    for(j=1;j<=i;j++)

    {

      printf("%d",x);

      x++;

    }

    printf("\n");

  }

  getch();

}
```

## OUTPUT-:

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"  
1  
23  
456  
78910  
_
```

**Q 25. Write a c program to following pattern:**

```
*  
  
* *  
  
* * *  
  
* * * *
```

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

```

```
        printf(" ");  
    }  
}  
printf("\n");  
}  
getch();  
}
```

## OUTPUT-:

**Q 26. Write a program to following pattern:**

**A**

**A B**

**A B C**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int i,j;

char x='A';

for(i=1;i<=3;i++)

{ x='A';

for(j=1;j<=3;j++)

{ if(j<=i)

{printf("%c",x);

x++;

}

else

printf(" ");

}

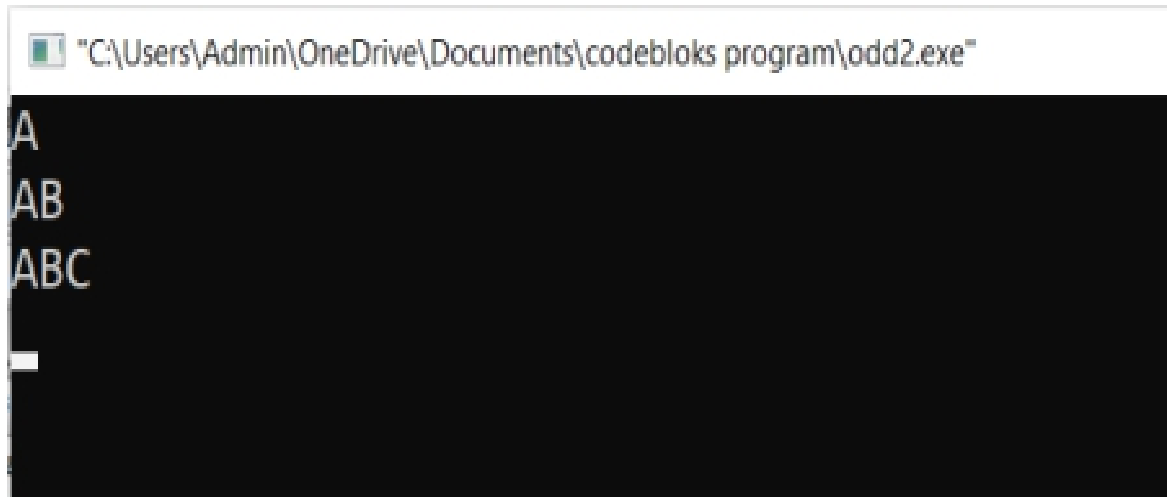

printf("\n");

}

getch();

}
```

## OUTPUT-:

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\odd2.exe"  
A  
AB  
ABC  
  
_
```

**Q 27. Write a program to following pattern:**

**A**

**B C**

**D E F**

**G H I J**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main() {

    int i,j;

    char x='A';

    for(i=1;i<=4;i++) {

        for(j=1;j<=i;j++){

            printf("%c",x);

            x++;

        }

        printf("\n");

    }

    getch();

}
```

**OUTPUT-:**

**Q 28. Write a program in c to perform maths and character library function using switch case**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

**// program in c to perform maths library function**

```
#include<stdio.h>

#include<conio.h>

#include<math.h>

void main()

{   int n,x,y;

    while(1){

        printf("\n\t\n\tChoose these function to perform : ");

        printf("\n\t1. Sqrt function ");

        printf("\n\t2. Power function ");

        printf("\n\t3. Ceil function ");

        printf("\n\t4. Floor function ");

        printf("\n\t5. exit ");

        scanf("%d",&n);

        switch(n){

        case 1:   printf("\n\t1. Sqrt function ");

                    printf("\n\tEnter number : ");

                    scanf("%d",&x);

                    y=sqrt(x);

                    printf("\n\tAnswer is : %d",y);

                    break;
```

```

case 2:  printf("\n\tPower function ");

         printf("\n\tEnter number : ");

         scanf("%d",&x);

         y=pow(x,2);

         printf("\n\tAnswer is : %d",y);

         break;

case 3:  printf("\n\tCeil function ");

         printf("\n\tEnter number : ");

         scanf("%d",&x);

         y=ceil(x);

         printf("\n\tAnswer is : %d",y);

         break;

case 4:  printf("\n\tFloor function ");

         printf("\n\tEnter number : ");

         scanf("%d",&x);

         y=floor(x);

         printf("\n\tAnswer is : %d",y);

         break;

case 5:  printf("\n\tSucessfully exited!! \n");

         exit(0);

default: printf("\n\tInvailed option ");

        }

        }

        getch();

    }

```

## OUTPUT-:

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

Choose these function to perform :
1. Sqrt function
2. Power function
3. Ceil function
4. Floor function
5. exit 2

Power function
Enter number : 6

Answer is : 36

Choose these function to perform :
1. Sqrt function
2. Power function
3. Ceil function
4. Floor function
5. exit 5

Sucessfully exited!!

Process returned 0 (0x0)   execution time : 21.393 s
Press any key to continue.
```

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

**//Program character library function**

```
#include<stdio.h>

#include<conio.h>

#include<ctype.h>

void main()

{

    char ch;

    printf("\nCtype header file ");

    printf("\nEnter any character :");

    scanf("%c", &ch);

    if ( isalpha(ch))

        printf ( "\nEntered character is alphabetic" );

    else

        printf ( "\nEntered character is not alphabetic" );

    if ( isdigit ( ch ) )

        printf ( "\nEntered character is digit" );

    else

        printf ( "\nEntered character is not digit" );

    if ( isalnum ( ch ) )

        printf ( "\nEntered character is alphanumeric" );

    else

        printf ( "\nEntered character is not alphanumeric" );
```

```

if ( isspace ( ch ) )

printf ( "\nEntered character is space" ) ;

else

    printf ( "\nEntered character is not space" ) ;

if(isalpha(ch))

    printf ( "\nEntered character is converted into " \

        "lower character : %c\n",tolower ( ch ) ) ;

else

    printf("Entered character is not an alphabetic");

if(isalpha(ch))

    printf ( "\nEntered character is converted into " \

        "upper character : %c\n",toupper ( ch ) ) ;

else

    printf("Entered character is not an alphabetic");

    getch();

}

```

### OUTPUT-:

```

C:\Users\Admin\OneDrive\Documents\codebloks program\add.exe
Ctype header file
Enter any character :l

Entered character is alphabetic
Entered character is not digit
Entered character is alphanumeric
Entered character is not space
Entered character is converted into lower character : l

Entered character is converted into upper character : L
_

```

## 29. Write a program to demonstrate the command line argument.

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

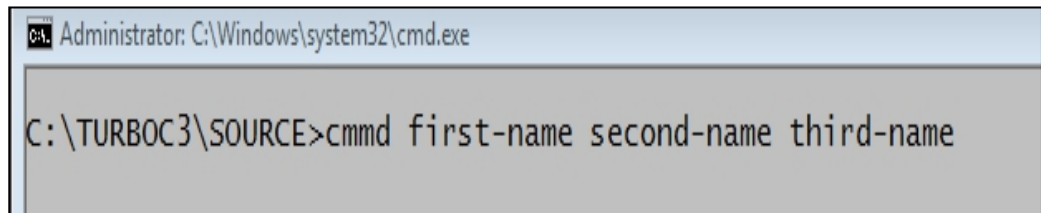

---

```
#include<stdio.h>

#include<conio.h>

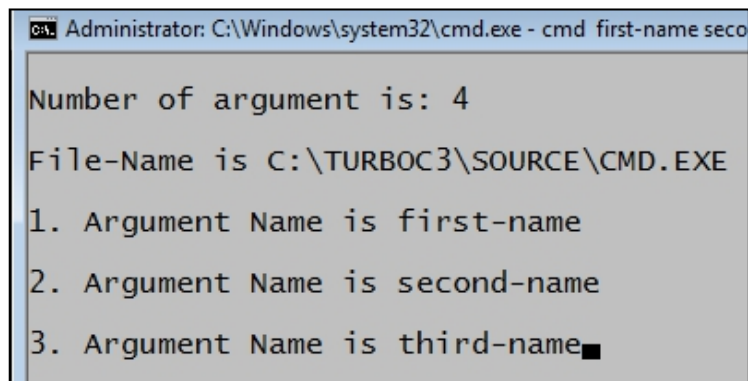

void main(int arg, char *argv[]) {
    int i;
    clrscr();
    printf("Number of argument is: %d",arg);
    for(i=0;i<arg;i++)
    { If(i<=0)
        printf("\nFile-name is %s", argv[i]);
    else
        printf("\nArgument Name is %s",i+1,argv[i]);
    }
    getch();
}
```

**OUTPUT-:**

Administrator: C:\Windows\system32\cmd.exe

C:\TURBOC3\SOURCE>cmd first-name second-name third-name

Administrator: C:\Windows\system32\cmd.exe - cmd first-name seco

Number of argument is: 4

File-Name is C:\TURBOC3\SOURCE\CMD.EXE

1. Argument Name is first-name

2. Argument Name is second-name

3. Argument Name is third-name

**Q 30. Write a program to swapping of two number using call by value and call by reference.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

### **1.Using Call by value-:**

```
#include<stdio.h>

#include<conio.h>

void swap(int x,int y);

void main()

{ int a=10,b=20;

printf("without swaping a= %d and b= %d \n",a,b);

swap(a,b);

getch();

}

void swap(int x,int y)

{ int t;

t=x;

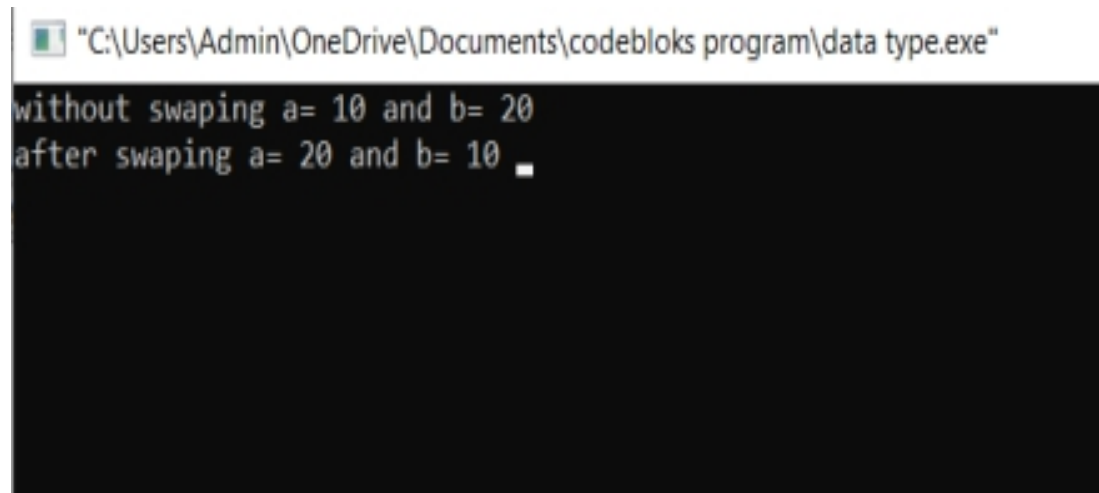

x=y;

y=t;

printf("after swaping a= %d and b= %d ",x,y);

}
```

## OUTPUT-:

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
without swaping a= 10 and b= 20
after swaping a= 20 and b= 10
```

:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe

### Coding for the program-:

Author-: Jeetu Sahu

---

### 2.Ussing Call By Reference-:

```
#include<stdio.h>

#include<conio.h>

void swap(int *x, int *y);

void main()

{ int a=10,b=20;

printf("without swaping a= %d and b= %d \n",a,b);
swap(&a,&b);

printf("after swaping a= %d and b= %d ",a,b);

getch();

}

void swap(int *x,int *y)

{

int t;

t=*x;
```

```
        *x=*y;  
        *y=t;  
    }
```

### OUTPUT-:

 "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

```
without swaping a= 10 and b= 20  
after swaping a= 20 and b= 10 _
```

**Q 31. Write a program to differentiate local and global variable.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

int z;    //globe variable

int add(int ,int);

void main()

{ int a,b; //local variables

printf("enter two number");

scanf("%d%d",&a,&b);

z=add(a,b);

printf("sum is %d",z);

getch();

}

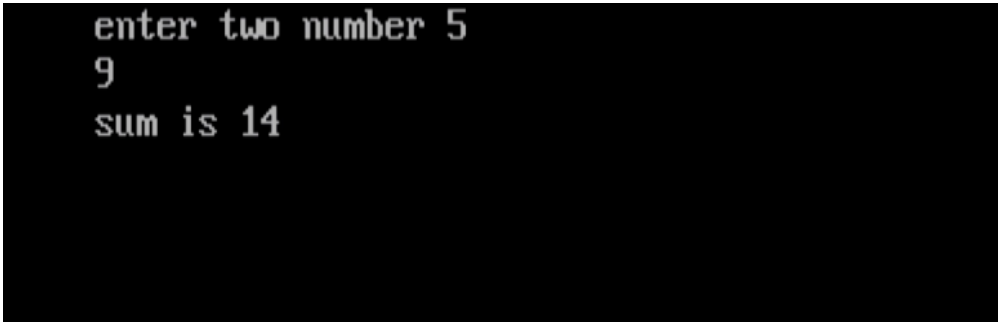

int add(int x, int y)

{ z=x+y;

return(z);

}
```

**OUTPUT-:**

A screenshot of a terminal window with a black background and white text. The text shows the program's execution: 'enter two number' followed by '5' on the next line, then '9' on the next line, and finally 'sum is 14' on the next line.

```
enter two number 5
9
sum is 14
```

**Q 32. Write a c program to show the use of static variable.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void f1(void);

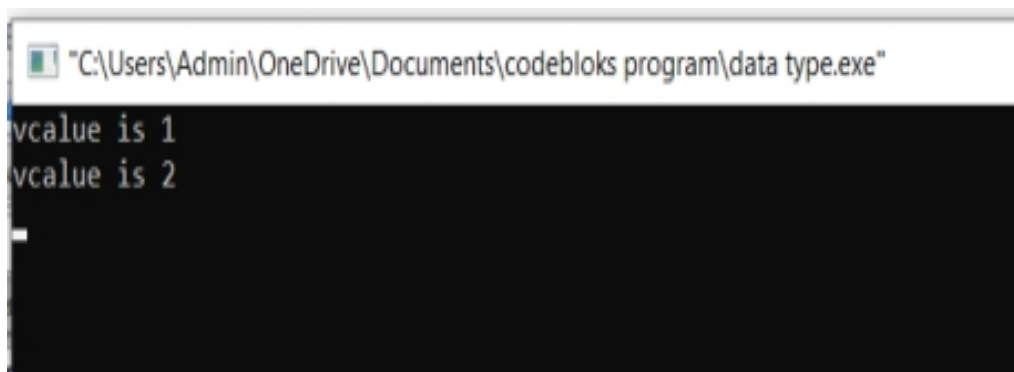

void main()
{
    f1();
    f1();
    getch();
}

void f1()
{
    static int x;

    x++;

    printf("vvalue is %d\n",x);
}
```

**OUTPUT-:**

### Q 33. calculate the volume through function.

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void fl(int ,int);

void main()

{ int a,b;

printf("enter two number");

scanf("%d%d",&a,&b);

fl(a,b);

getch();

}

void fl(int x,int y)

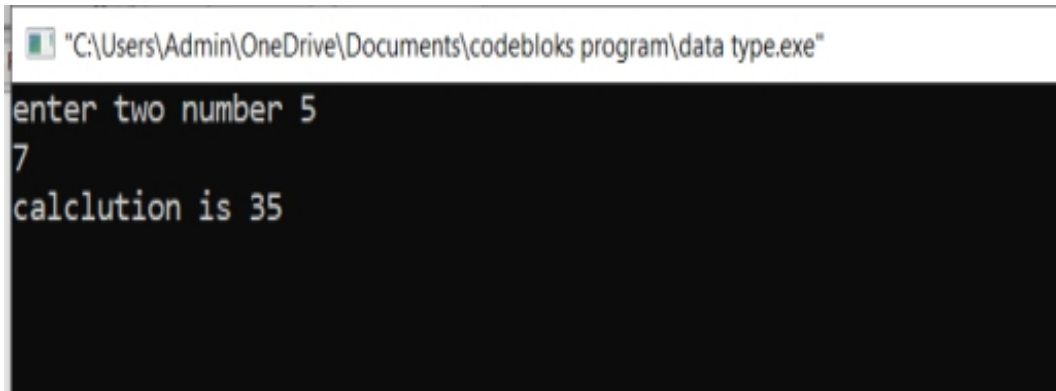

{ int z;

z=x*y;

printf("calclution is %d",z);

}
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
enter two number 5
7
calclution is 35
```

**Q 34. write a program to find area of circle and area of rectangle using the function return type.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void f1(int);

void f2(int a,int b );

void main()

{ int l,ch;

float r;

printf("enter radius");

scanf("%f",&r);

f1(r);

printf("\nenter height and width");

scanf("%d%d",&l,&ch);

f2(l,ch);

getch();

}

void f1(int x )

{

float aoc;

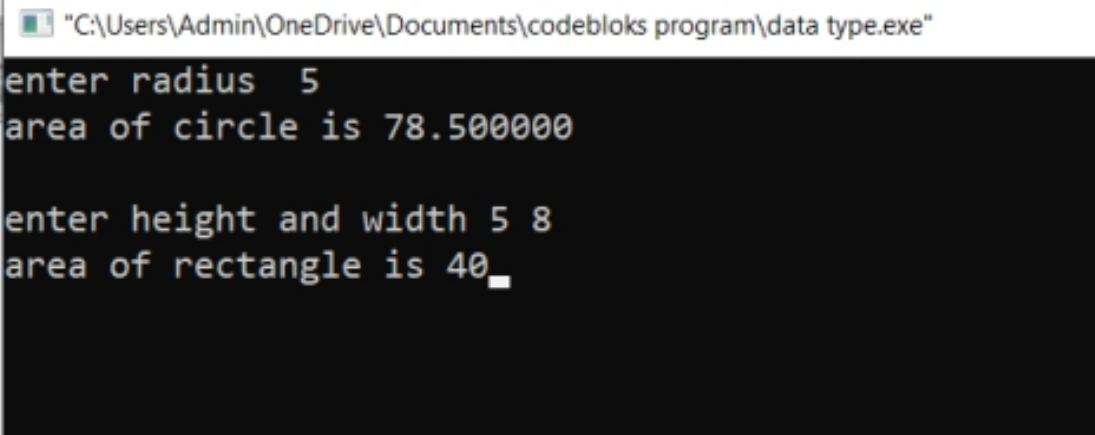

aoc=3.14*x*x;

printf("area of circle is %f\n",aoc);

}
```

```
void f2(int a,int b )  
{  
    int c;;  
    c=a*b;  
    printf("area of rectangle is %d",c);  
}
```

### OUTPUT-:

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"  
enter radius 5  
area of circle is 78.500000  
  
enter height and width 5 8  
area of rectangle is 40_
```

**Q 35. Write a program to add two no by using 4th category of function(Return type with argument)**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

int add(int ,int);

void main()

{ int a, b,c;

printf("Enter two number");

scanf("%d%d",&a,&b);

c=add(a,b);

printf("sum is : %d",c);

getch();

}

int add(int x,int y)

{ int z;

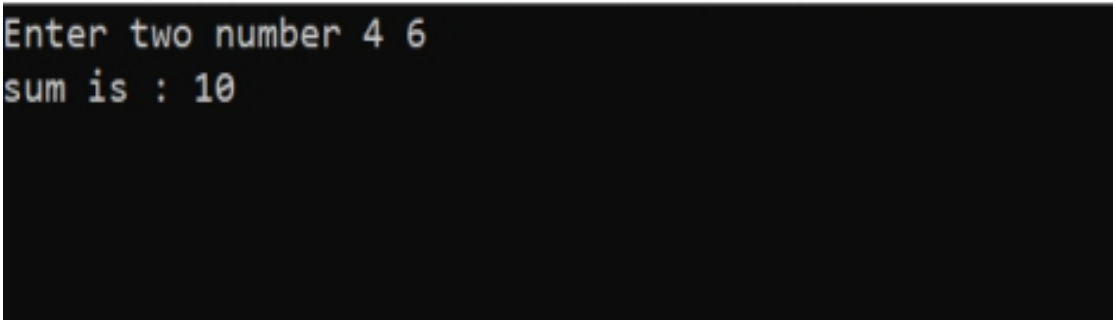

z=x+y;

return(z);

}
```

**OUTPUT-:**

 "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

```
Enter two number 4 6
sum is : 10
```

**Q 36. Write a program in C to read 10 numbers from keyboard and find their sum and average.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int i,sum=0;

float avg;

printf("Enter 10 number");

for(i=1;i<=10;i++)

{ scanf("%d",&i);

sum=sum+i;

}

avg=sum/10.0;

printf("sum is : %d\n",sum);

printf("\naverage is : %f",avg);

getch();

}
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
Enter 10 number 1
2
3
4
5
6
7
8
9
10
sum is : 55
average is : 5.500000
```

**Q 37. Write a program to find factorial of a number using recursion.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

int fact(int );

void main()

{ int x,z;

printf("enter a number");

scanf("%d",&x);

z=fact(x);

printf("factorial is %d",z);

getch();

}

int fact(int n)

{ int ft=1;

if(n==1)

return(n);

ft=n*fact(n-1);

return(ft);

}
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
enter a number 5
factorial is 120
```

### Q 38. write a c program to calculate power using recursion

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>
#include<conio.h>
int recu(int ,int );
void main()
{   int base, a;
    int result;
    clrscr();
    printf("\tEnter the base number : ");
    scanf("%d", &base);
    printf("\n\tEnter power number :");
    scanf("%d", &a);
    result= recu( base, a);
    printf("\n\tGiven number is %d and power is %d and result
is : %d",base, a, result);
    getch();

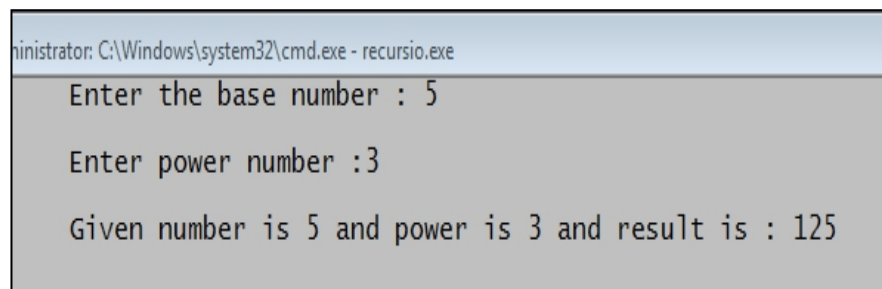

}

int recu(int base,int a)
{
    if(a!=0)
    { base = base * recu (base ,a-1);
      return(base); }
    else
    return 1;

}
```

---

**OUTPUT-:**

```
Administrator: C:\Windows\system32\cmd.exe - recursio.exe
Enter the base number : 5
Enter power number :3
Given number is 5 and power is 3 and result is : 125
```

**Q 39. Write a program to take input of 10 element, store and display it using one Dimensional array .**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int a[10],i;

    printf("enter 10 number ");

    for(i=0;i<10;i++) {

        scanf("%d",&a[i]);

    }

    printf("your entered number is :");

    for(i=0;i<10;i++){

        printf("\n%d",a[i]); }

    getch();

}
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
enter 10 number 10
20
30
40
50
60
70
80
90
101
your entered number is :
10
20
30
40
50
60
70
80
90
101
```

**Q 40. Write a program to find sum of 10 natural no using 1-D array.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{

    int a[10]={1,2,3,4,5,6,7,8,9,10};

    int i,sum=0;

    for(i=0;i<10;i++)

    {

        sum=sum+a[i];

    }

    printf("sum of 10 natural number is : %d",sum);

    getch();

}
```

**OUTPUT-:**

A screenshot of a Windows command prompt window. The title bar at the top reads "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe". The command prompt shows the output of the program: "sum of 10 natural number is : 55\_". The text is displayed in a monospaced font on a black background.

**Q 41 .Write a program in c to search an element from an array by linear search method.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

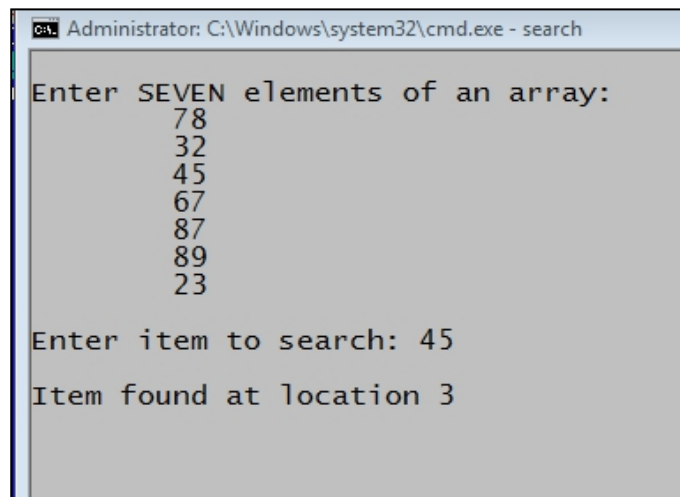

```
#include <stdio.h>

void main()
{
    int a[10], i, item;
    clrscr();
    printf("\nEnter SEVEN elements of an array:\n");
    for (i=0; i<=6; i++)
    { printf("\t");
      scanf("%d", &a[i]);}
    printf("\nEnter item to search: ");
    scanf("%d", &item);
    for (i=0; i<=9; i++)
        if (item == a[i])
        {
            printf("\nItem found at location %d", i+1);
            break;
        }
    if (i > 9)
        printf("\nItem does not exist.");
    getch();
}
```

---

**OUTPUT-:**

**:-**

```
Administrator: C:\Windows\system32\cmd.exe - search

Enter SEVEN elements of an array:
78
32
45
67
87
89
23

Enter item to search: 45

Item found at location 3
```

**Q 42. Write a program in c to sort element of array in ascending order.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int a[10]={20,40,30,10,50,80,100,90,60,70};

Sum of matrices are:  
6      8      5  
4      4      7  
10     7      3
```

#### **Q 44. Write a program in c to perform multiplication of two matrix**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

void main()
{
    int a[3][3],b[3][3],c[3][3],i,j,k,sum;
    clrscr();

    printf("\nEnter the matrix elements of A\n");
    for(i=0;i<3;i++)
    {
        for(j=0;j<3;j++)
        {
            scanf("%d",&a[i][j]);
        }
        printf("\n");
    }
    printf("\nEnter the matrix elements of B\n");
    for(i=0;i<3;i++)
    {
        for(j=0;j<3;j++)
        {
            scanf("%d",&b[i][j]);
        }
        printf("\n");
    }
    for(i=0;i<3;i++)
    {
        for(j=0;j<3;j++)
        {
            sum=0;
            for(k=0;k<3;k++)
            {
                sum=sum+a[i][k]*b[k][j];
            }
        }
    }
}
```

```

    }
    c[i][j]=sum;
}
}
printf("\nProduct of two matrix is:\n\n");
for(i=0;i<3;i++)
{
for(j=0;j<3;j++)
{
    printf(" \t%d",c[i][j]);

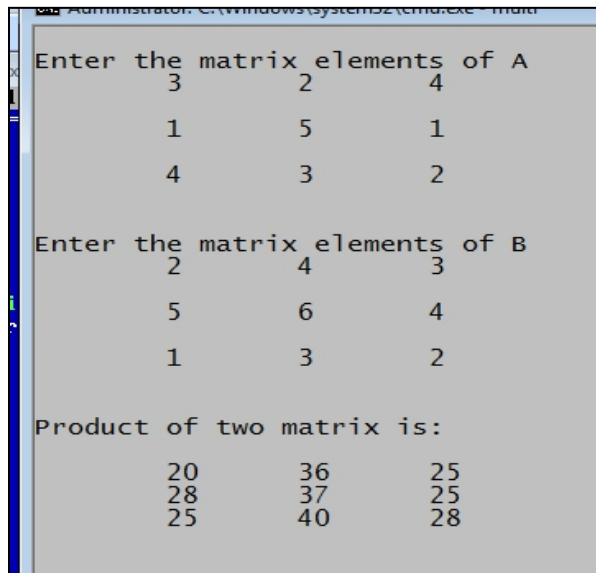

}
printf("\n");
}

getch();
}

```

---

Output:-

```

Administrator: C:\Windows\system32\cmd.exe - multi
Enter the matrix elements of A
3      2      4
1      5      1
4      3      2

Enter the matrix elements of B
2      4      3
5      6      4
1      3      2

Product of two matrix is:
20     36     25
28     37     25
25     40     28

```

## Q 45. Write a program to find Transpose of a matrix.

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int a[6],b[3],i;

printf("entetr 6 number for matrix :");

for(i=0;i<6;i++)

{ scanf("%d",&a[i]);

}

printf("\ntransport matrix :\n");

for(i=0;i<6;i++)

{ b[i]=a[i];

} printf("after transport is :\n");

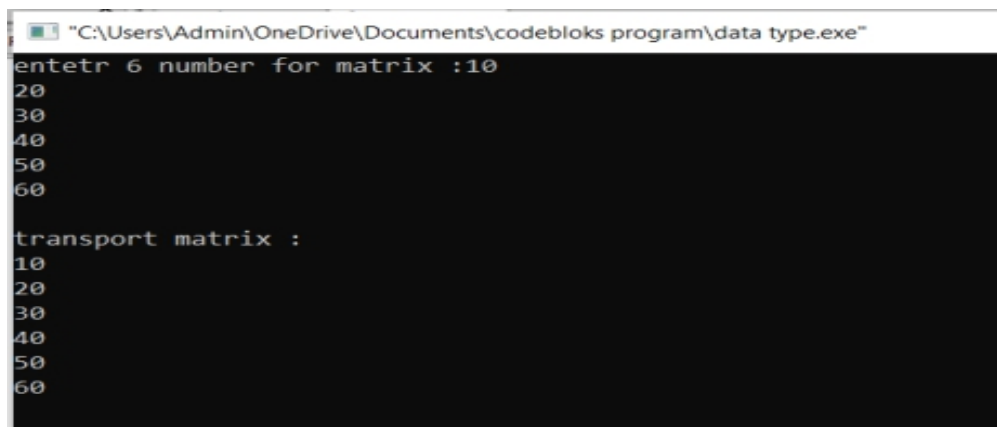

for(i=0;i<6;i++)

{ printf("%d\n",b[i]);

}

getch(); }
```

**OUTPUT-:**

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"
entetr 6 number for matrix :10
20
30
40
50
60

transport matrix :
10
20
30
40
50
60
```

**Q 46. Write a program to print String and findout their length without using library function.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

int length(char *s);

void main()

{ char str[10];

printf("enter a string");

scanf("%s",str);

printf("your entered string is %s\n",str);

printf("length is %d",length(str));

getch();

}

int length(char *s)

{

int l;

for(l=0;*(s+l)!='\0';l++);

return(l);

}
```

**OUTPUT-:**

 "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

```
enter a string jeetu
your entered string is jeetu
length is 5
```

**Q 47. Write a program to copy one String into another String without using library function.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ char str[10]="computer";

  char cs[10];

  int i;

  for(i=0;str[i]!='\0';i++){

      cs[i]=str[i];

  }

  str[8]='\0';

  puts(cs);

  getch();

}
```

**OUTPUT-:**

 "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

computer

**Q 48. Write a c program to perform string manipulation by Using library function.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

#include<string.h>

void main()

{char str[20],cs[20];

char tt[]=" bhai";

int l,i;

printf("enter a string : ");

gets(str);

l=strlen(str);

printf("\nLength of given string is : %d ",l);

strupr(str);

printf("\nUpper case string : %s ",str);

strlwr(str);

printf("\nLowwer case string : %s ",str);

strcpy(cs,str);

printf("\nCopied string is %s ",cs);

strcat(str,tt);

printf("\nConcatenet string is : %s",str);

strrev(str);

printf("\nReversed string is %s ",str);

getch();
```

}

## OUTPUT-:

 "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

```
enter a string : Ramu  
  
Length of given string is : 4  
Upper case string : RAMU  
Lower case string : ramu  
Copied string is ramu  
Concatenat string is : ramu bhai  
Reversed string is iahb umar
```

**Q 49. Write a program to check entered string is palindrome or not.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

#include<string.h>

void main()

{char str[20];

int l,i;

printf("enter a string : ");

gets(str);

l=strlen(str);

for(i=0;i<l/2;i++){

    if(str[i]!=str[l-1-i]){

        printf("Not a palindrom");

        break;

    }

}

if(i==l/2){

    printf("Palidrom");

}

getch();

}
```

## OUTPUT-:

 "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

```
enter a string : jeetu  
Not a palindrom
```

 "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

```
enter a string : malayalam  
Palidrom
```

**50. Write a c program to read and print an employee's details like name,employee id,salary etc. using structure.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

struct employee

{ char name[10];

  int id; //

  int salary;

};

void main()

{ struct employee emp[5];

  int i;

  printf(" Enter any five employee's name , Id and Salary \n ");

  for(i=0;i<=5-1;i++)

  { printf("\n Enter the %d employee name ,Id and Salary ",i+1);

    scanf("%s%d%d",emp[i].name,&emp[i].id,&emp[i].salary) ;

  }

  printf("\n");

  for(i=0;i<=5-1;i++)

  { printf("\n The %d employee Name is %s , Id is %d and Salary is %d : ",i+1,emp[i].name,emp[i].id,emp[i].salary);

  }

  getch();

}
```

## OUTPUT-:

 "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

Enter any five employee's name , Id and Salary

Enter the 1 employee name ,Id and Salary Jeetu 1 500000

Enter the 2 employee name ,Id and Salary Ravi 2 400000

Enter the 3 employee name ,Id and Salary Ram 3 300000

Enter the 4 employee name ,Id and Salary Raj 4 200000

Enter the 5 employee name ,Id and Salary Jai 5 100000

The 1 employee Name is Jeetu , Id is 1 and Salary is 500000 :

The 2 employee Name is Ravi , Id is 2 and Salary is 400000 :

The 3 employee Name is Ram , Id is 3 and Salary is 300000 :

The 4 employee Name is Raj , Id is 4 and Salary is 200000 :

The 5 employee Name is Jai , Id is 5 and Salary is 100000 :

**Q 51. Create a structure student having data members to store roll number, name of student, name of three subjects, max marks. Write a program to declare a structure variable of student, provide facilities to input data in data member and display result of student.**

**Answer:-**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program:-**

**Author:- Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

struct student
{
    int rollNo;

    char studentName[10];

    char subjectName[10];

    int Marks;

};

void main()

{
    struct student sRollNo,sName[2],sSub[3],sMark;

    int i,j;

    printf(" Enter any two student's name ,Roll Number , the three subject and student marks \n ");

    for(i=0;i<=2-1;i++){

        printf("\n Enter the %d student name and Roll number ",i+1);

        scanf("%s%d",sName[i].studentName,&sRollNo.rollNo) ;

    }

    printf("\n");

    for(i=0;i<=2-1;i++){

        for(j=0;j<=3-1;j++){

            printf("\n Enter the  %d subject and marks for  %d student ",j+1,i+1);
```

```

scanf("%s%d",&sSub[j].subjectName,&sMark.Marks) ;

}

}

for(i=0;i<=2-1;i++){

    printf("\n The %d student name is %s and Roll number %d",i+1,sName[i].studentName,sRollNo.rollNo);

}

for(i=0;i<=2-1;i++){

    for(j=0;j<=3-1;j++){

    }

}

getch();

}

```

## OUTPUT-:

 "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

```

Enter any two student's name ,Roll Number , the three subject and student marks
Enter the 1 student name and Roll number   Jeetu   101
Enter the 2 student name and Roll number   Ravi    102

Enter the 1 subject and marks for 1 student  Maths   86
Enter the 2 subject and marks for 1 student  Science  96
Enter the 3 subject and marks for 1 student  Hindi    98
Enter the 1 subject and marks for 2 student  Maths    78
Enter the 2 subject and marks for 2 student  Science   86
Enter the 3 subject and marks for 2 student  Hindi     67

The 1 student name is Jeetu and Roll number 102
The 2 student name is Ravi and Roll number 102
The 1 subject is Maths and marks gets 1 student is 67
The 2 subject is Science and marks gets 1 student is 67
The 3 subject is Hindi and marks gets 1 student is 67
The 1 subject is Maths and marks gets 2 student is 67
The 2 subject is Science and marks gets 2 student is 67
The 3 subject is Hindi and marks gets 2 student is 67

```

**Q 52. Write a c program to demonstrate structure of array.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

struct book
{ char bname[10];
  int bid;
  float bprice;
} ;

void main()
{ int i;
  struct book b1[3];
  for(i=0;i<3;i++){
    printf("\n Enter the %dst book name ,Id and price",i+1);
    scanf("%s%d%f",b1[i].bname,&b1[i].bid,&b1[i].bprice);
  }
  printf("\n");
  for(i=0;i<3;i++){

```

**Q 54. Write a program in c to find the sum of an array element using pointer and function.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

int sum(int *p);

void main()

{ int a[5]={2,3,5,6,7};

  int s;

  s=sum(&a);

  printf("sum is %d",s);

  getch();

}

int sum(int *p)

{ int i,s=0;

  for(i=0;i<5;i++){

    s=s+(*(p+i));

  }

  return(s);

}
```

**OUTPUT-:**  "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

sum is 23

## Q 55. Write a program to sum of two no using pointer.

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()
{
    int a,b,c,*p,*q;

    p=&a;
    q=&b;

    printf("enter two number");

    scanf("%d%d",&a,&b);

    c=*p+*q;

    printf("sum is %d",c);

}
```

**OUTPUT-:**

 "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

```
enter two number 12 12
sum is 24
Process returned 9 (0x9)   execution time : 3.487 s
Press any key to continue.
```

**Q 56. Write a program in c to show the pointer to pointer.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int x,*p,**q;

  p=&x;

  q=&p;

  printf("enter a number");

  scanf("%d",&x);

  printf("value available at x : %d",*p);

  printf("\nvalue available at *p: %d",*p);

  printf("\nvalue available at **q: %d",**q);

  getch();

}
```

**OUTPUT-:**

**Q 57. Write a program in c to find the maximum number between two number using a Pointers.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ int a,b,*p,*q;

  p=&a;

  q=&b;

  printf("enter two number");

  scanf("%d%d",&a,&b);

  if(*p>*q)

    printf("greater number is %d",*p);

  else

    if(*p==*q)

      printf("both are equal");

    else

      printf("greater number is %d",*q);

  getch();

}
```

**OUTPUT-:**

**Q58. Write a c program to read and print the student details using structure and Dynamic memory Allocation. Using malloc().**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

#include<stdlib.h>

struct emp

{

int id;

char name[20];

};

void main()

{

struct emp* p;

int record,i;

p=(struct emp*)malloc(record*sizeof(struct emp));

if(p==NULL)

printf("memory is not allocate");

else

printf("Enter number of record");

scanf("%d",&record);

for(i=1;i<=record;i++)

{

printf("\n\nEnter employee id and name");
```

```
scanf("%d%s",&(p+i)->id, &(p+i)->name);

}

for(i=1;i<=record;i++)

{

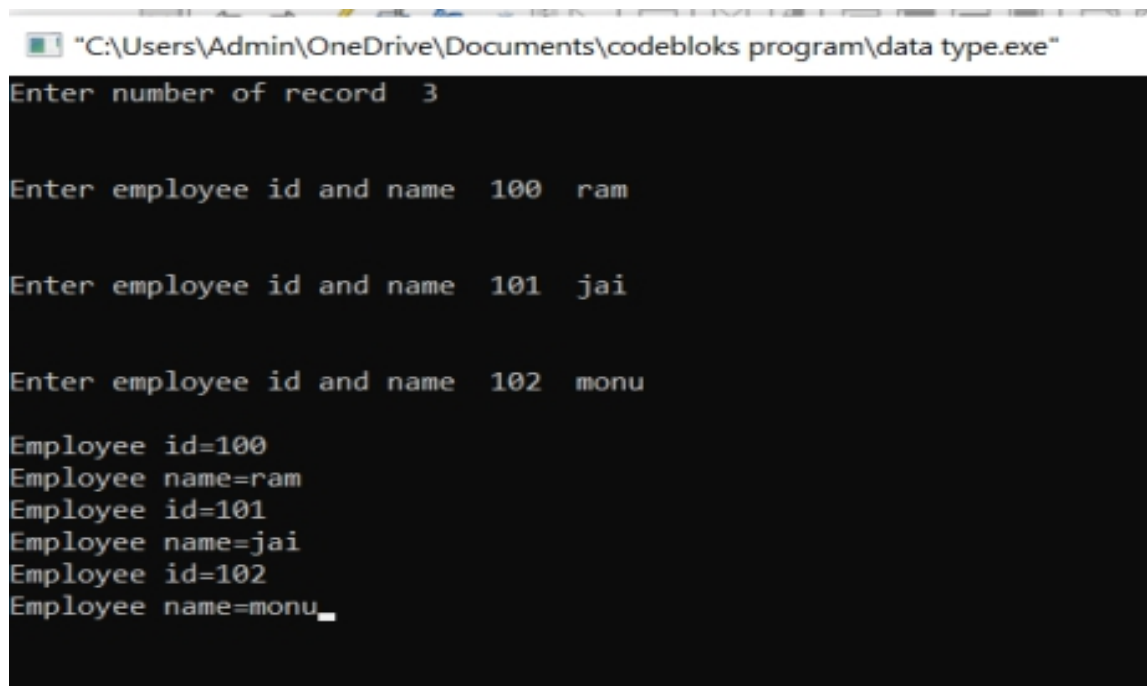

printf("\nEmployee id=%d\nEmployee name=%s",(p+i)->id,(p+i)->name);

}

getch();

}
```

### OUTPUT-:

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

Enter number of record 3

Enter employee id and name 100 ram

Enter employee id and name 101 jai

Enter employee id and name 102 monu

Employee id=100
Employee name=ram
Employee id=101
Employee name=jai
Employee id=102
Employee name=monu_
```

**Q 59. Write a program in c to create a float array dynamically using calloc().input values and display.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

#include<stdlib.h>

void main()

{

    int a,i;

    float*p;

    printf("numbers of elememts to be entered");

    scanf("%d",&a);

    p=(float*)calloc(a,sizeof(float));

    if(p==NULL)

        printf("memory to be not allocated");

    else

    {

        printf("Enter %d number\n", a);

        for(i=0;i<a; i++)

            scanf("%f", &p[i]);

        printf("The numbers entered are:\n");

        for(i=0; i<a; i++)

            printf("%f\n", p[i]);

    }

    free(p);
```

```
getch();
```

```
}
```

### OUTPUT-:

```
"C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"  
numbers of elements to be entered 4  
Enter 4 number  
12  
21  
32  
43  
The numbers entered are:  
12.000000  
21.000000  
32.000000  
43.000000
```

**Q 60. Write a program in c to create a text file .write contents using fprintf and read from file using fscanf**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

**// writing a content in a file using fprintf ()**

```
#include<stdio.h>

#include<conio.h>

void main()

{ int a,b;

FILE *fp;

fp=fopen("f1.txt","w");

printf("enter two number");

scanf("%d%d",&a,&b);

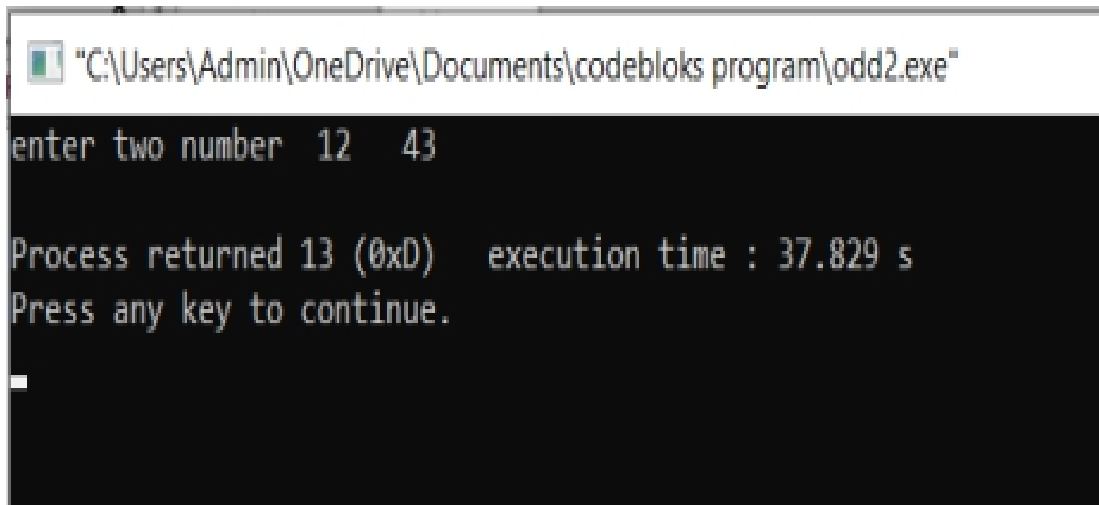

fprintf(fp,"%d\n%d\n%d",a,b,a+b);

fclose(fp);

getch();

}
```

**OUTPUT-:**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

**//reading the content in a file using fscanf()**

```
#include<stdio.h>

#include<conio.h>

void main()

{ int a,b,c;

FILE *fp;

fp=fopen("fl.txt","r");

fscanf(fp,"%d\n%d\n%d",&a,&b,&c);

printf("sum of a=%d and b=%d is %d",a,b,c);

fclose(fp);

getch();

}
```

**OUTPUT-:**

 "C:\Users\Admin\OneDrive\Documents\codebloks program\odd2.exe"

sum of a=12 and b=43 is 55\_

**Q 61. Write a program in c to create a text file .write contents using fwrite and read from file using freadf**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

**// write contents using fwrite function**

```
#include<stdio.h>

#include<conio.h>

void main()

{ struct book{

    int bookid;

    char title[20];

    float price;

}b1;

FILE *fp;

fp=fopen("mybook.dat","ab");

printf("enter bookid, title and price : ");

scanf("%d",&b1.bookid);

fflush(stdin);

gets(b1.title);

scanf("%f",&b1.price);

fwrite(&b1,sizeof(b1),1,fp);

fclose(fp);

}
```

## OUTPUT-:

 Select "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

```
enter boolid, title and price : 100
```

```
c language
```

```
345.56
```

```
Process returned 0 (0x0)   execution time : 22.470 s
```

```
Press any key to continue.
```

 "C:\Users\Admin\OneDrive\Documents\codebloks program\data type.exe"

```
enter boolid, title and price : 101
```

```

**Q 62. Write a program to demonstrate fseek and rewind.**

**Answer-:**

**:C:\Users\Admin\OneDrive\Documents\codebloks program\datatype.exe**

**Coding for the program-:**

**Author-: Jeetu Sahu**

---

```
#include<stdio.h>

#include<conio.h>

void main()

{ char str[30];

FILE *fp;

fp=fopen("fl.txt","r+");

fgets(str,20,fp);

printf("file is : %s ",str);

fseek(fp,10,0);

fputs(" programming",fp);

rewind(fp);

fgets(str,25,fp);

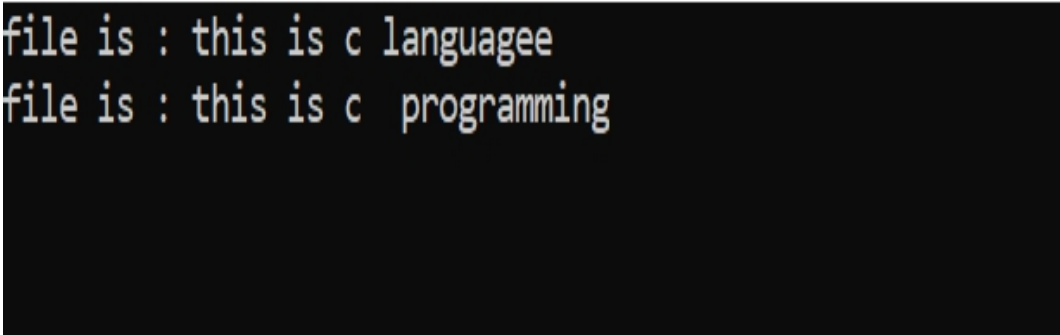

printf("\nfile is : %s",str);

fclose(fp);

getch();

}
```

**OUTPUT-:**  "C:\Users\Admin\OneDrive\Documents\codebloks program\odd2.exe"

```
file is : this is c languagee
file is : this is c programming
```
